1.0 PROJECT BACKGROUND

1.1 Introduction

During implementation of UTaNRMP, financing of CIGs project proposals will be through two key windows namely: (i) Project Coordinating Team (PCT) and ii) Water Services Trust Fund (WSTF) windows. This manual provides modalities, processes and procedures that will be applied for funding through PCT window. The preparation of this manual is guided by the Project Design Report, Loan Agreement as well as other GOK and IFAD policy documents. The manual has borrowed from experiences of other Community Driven Development (CDD) such as the World Bank funded Natural Resources Management Project. This manual is prepared with the specific purpose of providing a tool to clearly define the means through which the Sustainable Rural Livelihood and Sustainable Water and Natural Resources Management components will operate and achieve the expected outputs. The outline of this manual is as follows:

Chapter 1: Project Background

Chapter 2: Introduction to the Grants Manual

Chapter 3: Roles and Responsibilities of Institutions Implementing the Grants

Chapter 4: Matching Grants Financing, Governance, Accountability processes and Procedures

Chapter 5: Financial Management and Procurement

Chapter 6: Appendices

1.2 Project Background Iinformation

The Upper Tana Natural Resources Management Project (UTaNRMP) is an eight year project (2012-2020) funded by Government of Kenya (GOK), International Fund for Agricultural Development (IFAD), Spanish Trust Fund (STF) and the Local Community. The **goal** of the project is to "contribute to rural poverty reduction in the Upper Tana river catchment". This goal is being pursued via two **development objectives** which reflect the poverty-environment nexus namely:(i) increased sustainable food production and incomes for poor rural households living in the project area; and (ii) sustainable management of natural resources for provision of environmental services.

The project area, which is the Upper Tana catchment, covers an area of 17,420 km². The project target area is 24 river basins and the tributaries of the five river basins formerly under MKEPP that drain into the Tana River. The area includes the Mt. Kenya and Aberdares National Parks and surrounding Forest Reserves.

The project area covers six counties namely; Embu, Tharaka Nithi, Meru, Nyeri, Kirinyaga and Murang'a. The Upper Tana catchment is home to 5.2 million people and is under heavy and growing

population pressure with a population density of 300 per Km². The project aims at poverty reduction targeting about 205,000 households (1,025,000 people) whose livelihoods revolve around the use of the natural resources of Upper Tana catchment.

These include smallholder crop and livestock farmers, agro-pastoralists, fishers, rural traders, and community groups involved in natural resources management (NRM) and income generating activities. Special focus is on women and youth as well as other vulnerable groups within the above categories. The project will provide indirect benefits to the non-target groups in the Upper Tana catchment through services and enterprises linked with the project activities, as well as to populations outside the catchment who rely on water and hydro-electricity from the river system. Project interventions will be progressively implemented beginning with further work on the tributaries of the five (5) MKEPP river basins, twelve (12) priority river basins and then twelve(12) of the remaining twenty four (24) basins as follows;

Table 1.1: Project River Basins and their Tributaries

Basins for			
UTaNRMP			

1.3 Project Components

The Implementation is through four components namely: Community Empowerment, Sustainable Rural Livelihoods, Sustainable Water Resources and Natural Resources Management and Project Coordination and Management. The planned outcomes are;

Component	Outcome
1. Community Empowerment	Rural communities empowered for sustainable management of natural resources
2. Sustainable Rural Livelihoods	• Natural resource-based rural livelihoods sustainably improved
3. Sustainable Water and Natural Resource Management	• Land, water and forest resources sustainably managed for the benefit of the local people and the wider community and
4. Project Management and Coordination	Project effectively and efficiently managed

Component 1: Community Empowerment This component is designed to empower communities to sustainably manage natural resources. It aims at engaging communities to build their capacity to develop plans aimed at improving NRM while also improving their livelihoods, food security and nutrition. The component therefore supports capacity building at community level through mobilization and awareness raising, establishing and strengthening key community structures and institutions, and development and implementation of community action plans. The outputs of this component include:

- i. Communities with increased awareness of sustainable NRM,
- ii. Key community organizations with increased capacity to manage Natural Resources sustainably, and
- iii. Community Action Plans for livelihood improvement and sustainable NRM.

Component 2: Sustainable Rural Livelihoods: This component aims at improving the incomes and living standards of the target group using interventions that are beneficial to the management of the natural resource base. The component's outputs include;

- i. Agricultural packages adapted to various agro-ecological and socio-economic contexts; and
- ii. CIGs successfuly adopt or improve farm and/or non-farm income generating activities (IGAs).

The above outputs are achieved through the following sub-components;

i. Adaptive research and demonstrations led by KARI -This includes On-farm trials and demonstrations, Soil fertility enhancement; and Seed multiplication and distribution. The Kenya Plant Health Inspection Services (KEPHIS) is responsible for regulatory oversight of seed multiplication and distribution while relevant government departments and service-providers are collaborators.

ii. **Adoption of IGAs through CIG's-** This is implemented by providing matching grants (30% by CIGs and 70% by the project). The FFS extension approach will be used mainly to ensure the success of the IGA's over and above other extension methods including demonstrations, study tours and farmer-to-farmer training.

Component 3: Sustainable Water and Natural Resource Management: This component is designed to improve the sustainable utilization of water and other natural resources, mainly using community groups including the WRUAs and the CFAs. The outputs are:

- i. Water resources of the Upper Tana catchment sustainably managed; and
- ii. Sustainably managed forest and agricultural ecosystems.

The outputs are achieved through two sub-components namely;

- (a) Sustainable Water Resources The activities address;
 - i. Sustainable management of water resources: Support for design and implementation of Sub Catchment Management Plans (SCMP)by WRUA's using grants channelled through WSTF and technical advice from WRMA.
 - ii. Community water development and management: Improve access to safe and clean water for domestic uses
- iii. Water-saving irrigation technologies: Emphasis on improving irrigation efficiency by use of controlled intake structures, pipes and lined canals to reduce wastage.
- iv. Remedial works on environmental hotspots: This targets hotspots that contribute to silt loads and pollution to water. The project targets specific problem areas such as road embankments, borrow pits, quarries, denuded hilltops, coffee processing plants, eroding riverbanks, wetlands, springs and urban waste disposal facilities.
 - (b) Sustainable Management of Forest and Agricultural Ecosystems: this sub-component will focus on:
- i. Rehabilitation of degraded forest reserves: Activities include capacity building of community groups in Participatory Forest Management, seedling production, enrichment planting of degraded forests, and the rehabilitation of degraded forest areas.
- ii. Efficient use of fuel wood: This includes fuel efficient stoves, biogas generators and charcoal kilns through matching grants, together with training in the manufacture and use of such equipment.
- iii. Human-wildlife conflict: Construction of solar powered wildlife control barriers in Mt Kenya
- iv. Soil and water conservation on farm lands: This is implemented through matching grants (30% beneficiaries and 70% Project).

Component 4: Project Management and Coordination: The component is designed to ensure that the project is effectively and efficiently managed. The objective is to enhance management in implementation and coordination of project activities so as to assess progress made towards achieving project objectives and project impacts.

The key institutional structures that will ensure smooth running of the project starting at the policy level up to the implementation level include: the Project Steering Committee (PSC), Project Coordinating Team (PCT), County Project Coordinating Committee (CPCC) and County Project Facilitating Committee (CPFC). Sub-County Implementing Teams (SCITs) will be established at sub-county levels to support community based institutions such as WRUAs, CFAs, FDACs and CIGs.

The component has two sub- components namely:

- i. **Project Management**: This encompasses Coordination, Planning and financial management (disbursements, procurements and audits).
- ii. **Knowledge Management and Learning (KM&L):** The project will develop a KM&L system that will encompass five key pillars namely: Monitoring and Evaluation; Information Management; Communication; Innovation and Experimentation and Learning and Adaptation.

An Independent Oversight Agent will be competitively recruited to support PCT to: Appraise community project proposals (desk and field), monitor implementation and report on agreed milestones.

The expected outputs for the component are:

- i. Fully functional Governance, Management, Monitoring and Reporting systems, and
- ii. Knowledge about Natural Resources Management effectively managed and disseminated to stakeholders.

2.0 INTRODUCTION TO GRANTS MANUAL

This manual provides an outline of the processes and procedures to be followed by Community Based Organizations such as Common Interest Groups in accessing, utilizing funds and accounting for project grants

2.1 Principles of the Manual

The following are the key principles of this manual:

a) Clarity / Open information provision/exchange

- i. Clear definition of roles and responsibilities: Roles and responsibilities for all stakeholders involved in the matching grants
- ii. Support to community groups involved with natural resource management
- iii. Public transparency in relation to process and results
- iv. Categorization of Proposals
- v. Provision of Technical Support Notes (TSNs)

The categorization of proposals and provision of technical support notes will entail the following:

I. categorization of proposals:

Category A: covers the standard IGA activities which are short time in nature, contribute to food security/ nutrition, contribute to household income and improves NRM.

Category B: includes NRM Special activities which contributes to the overall environmental management, are long term in nature and covers a bigger geographical area.

Category C: includes unique/innovative projects which require specialized technical inputs, high initial capital investments, high returns per unit costs and their benefits are widespread.

II. Technical support notes

The TSNs gives guidance to CIGs in three main technical areas:

- i. Uniformity in costs
- ii. Clarity of proposal content
- iii. Expected outputs
- iv. Scope

The TSNs are covering **five** main IGA sectors:

- i. Fisheries
- ii. Crops and related enterprises
- iii. Livestock and related enterprises
- iv. Forestry

b) Empowerment and Equity.

i) Empowerment of Community Based Organization (CBOs) and Community Interest Groups (CIGs). The manual places the community/community groups at the centre of their own

- development activities and managers of their own destiny.
- ii) Equity of funding of all approved proposed activities from the three proposal categories
- iii) Equity through detailed transparent eligibility criteria. Detailed eligibility criteria for ensuring equity for and the participation of all within a designated group. One element of the prioritization criteria being the determination of how the resources provided and benefits accrued are enjoyed by all the members of the group.
- iv) Strong institutional support links: Clear links between Common Interest Groups and legal community Associations namely the FDACs
- v) Contribution at community level: Community contribution by providing labour, local materials and cash being criterion for eligibility.

c) Transparency and Accountability

- i. Clear eligibility criteria: To ensure all proposals compete equally in relation to resource availability.
- ii. Shopping lists of single project options: Technical Support Notes (TSNs) will facilitate the preparation of frequently requested projects.
- iii. Mitigation measures against fiduciary risk: Detailed means provided to reduce risks of absconding and corruption while maintaining respective roles.
- iv. Budget Item: Separation of funds to facilitate clear audit/ trail and funds follow up.
- v. Efficient and effective service provision in supporting the community groups and their respective associations. The most effective means of service support, provision clarification on who to determine the most relevant service provider and the means of selection and engagement.
- vi. Complaints mechanism: A complaint mechanism to be established together with the process used to register, review and respond to complaints.

2.2 Grants Funding to CIGs

The project will provide matching grants to Common Interest Groups (CIGs) through Project Coordinating Team (PCT) to help them implement Income Generating Activities (IGAs) upon submission of acceptable proposals. The grants will be output-based with release of funds being made in tranches upon the achievement of milestones specified in the grants agreement between the PCT and the CIGs. The CIGs will receive an initial advance of the grant amount, and will subsequently request for further payments as each milestone is reached, and a simple milestone report is submitted.

The PCT will engage the services of an Independent Oversight Agent (a private service provider) to verify the milestones reports before further financial releases are made. This milestone-based payment system is intended to strengthen accountability and transparency as well as reduce the administrative burden associated with cash advances whereby each advance has to be surrendered before the next disbursement is made. The beneficiary CIGs will be required to contribute 10-30% while the project will provide matching grants of 70%-90% depending on the category. On exceptional cases upon application by the very vulnerable members of the community, the project may support the activity up to 100%

All proposals must:

- a) Integrate environmental conservation such as tree planting, water harvesting, soil and water conservation or other conservation activities;
- b) Show how it will contribute to improved incomes and food/ nutrition security;
- c) Show, whenever relevant, how the following cross-cutting issues have been integrated in the proposal, implementation and monitoring;
- i. Gender equality: Men and Women will participate in and benefit from the project;
- ii. Good Governance: Projects are run in a transparent manner and that the Project Management Committee (s) (PMCs) is accountable and engages the project beneficiaries throughout the different stages of project implementation;
- iii. Prevention of HIV/AIDS and improvement of livelihoods of people living with HIV/AIDs;
- iv. Participation and non-discrimination of vulnerable groups, such as orphans, elderly and people with physical challenges.
- d) Show that the proposed project has been collectively identified by the group and is a priority need:
- e) Show how the group will monitor the technical and financial aspects of implementation;
- f) Show how the outputs will be sustained after completion of the funded proposal.

2.3 Integration of Groups' proposals with Government Development Policies

The proposed community projects must be in line with the relevant sectoral development agenda and progressively align to County Development Plans. Therefore, the relevant technical department/institution must endorse on the Application Form that the proposed project is in line with the sector priorities.

The proposed project should not presently be supported by any other major development programme. Stalled projects due to lack of funds and which meet the eligibility criteria qualify for support. If the project stalled because of the following reasons the group may not be awarded a grant:

- Bankrupt, being wound up, or having their affairs administered by the courts;
- Convicted of an offence concerning their professional conduct;
- Guilty of professional misconduct;
- Non-compliant in fulfilling obligations relating to statutory payments payment of taxes etc;
- The subject of a judgment for fraud, corruption, involvement in a criminal activities or any other illegal activity; and
- Subject to a conflict of interest.

2.4 Financial Allocation and Eligibility Criteria

Depending on the category, 10% -30% community contribution of the total cost of the proposed project is required while the UTANRMP will contribute 70%-90% of the total costs. On exceptional cases upon application by the very vulnerable members of the community, the project may support the activity up to 100%

2.4.1 Eligibility: Who may apply?

- a) In order to be eligible for a grant, groups **must be**:
 - i. Common Interest Groups(CIGs)registered under the relevant government agencies (Social services, Attorney General and Cooperatives);
 - ii. Institutions Based CIGs: this includes schools and FBOs which must be registered with relevant government institutions.
- b) The groups are not eligible if they are or have been:
 - i. Bankrupt, being wound up, or having their affairs administered by the courts;
 - ii. Convicted (CIG officials) of an offence concerning their professional conduct;
 - iii. Guilty of grave professional misconduct (CIG officials);
 - iv. Noted not to fulfil their obligations relating to the payment of social security contributions or the payment of taxes;
 - v. The subject of a judgment for fraud, corruption, involvement in a criminal organization or any other illegal activity; and
 - vi. Subject to a conflict of interest.

In the "Declaration of Applicant", applicants must declare that they do not fall into any of the situations mentioned in 'b' above. The Declaration of Applicants must be completed and signed; otherwise the application may be excluded.

2.4.2 Monitoring and Evaluation:

Applicants should include in their full proposal appropriate measures for monitoring the implementation of the proposed project activities

2.4.3 Number of applications and grants per applicant:

- a) Group shall not submit more than one application;
- b) Group official shall not at the same time be official in another group applying for these grants;

2.4.4 Eligibility of costs

Eligible costs are those that may be taken into consideration for the grant. The categories of costs considered as eligible and non-eligible are indicated below. The budget is both a cost estimate and a ceiling for "eligible costs". Note that the eligible costs must be based on costs to be incurred in the implementation of the project.

Eligible costs

To be eligible, costs must meet all the following criteria:

- i. They are incurred during the implementation of the proposal;
- ii. Must be indicated in the estimated overall budget of the proposal;
- iii. Must be necessary for the implementation of the proposed project;
- iv. They are identifiable and verifiable, in particular being recorded in the accounting records of the group and determined according to the applicable accounting standards of Kenya; and
- v. Must be reasonable, justified and comply with the requirements of sound financial management.

Community Contributions

The contribution by the community can be in cash, in kind or both. In such cases, the value of such contributions must not exceed:

- i. Either the costs actually borne and duly supported by accounting documents; and
- ii. Costs generally accepted based on existing market rates.

If the applicant proposes co financing in kind, this must be included in the budget of the Proposal Application.

Ineligible costs as per the proposal

The following costs are not eligible:

- i. provisions for losses or debts;
- ii. Interest owed;
- iii. Items already financed in another framework;
- iv. Purchases of land or buildings;
- v. Credit to third parties;
- vi. Top-ups and salaries, whether from the applicant or its partner;
- vii. Administrative overhead costs (utility costs, Rent, etc)

3.0 ROLES AND RESPONSIBILITIES OF INSTITUTIONS ADMINISTERING THE GRANTS

3.1 Overview of Institutional Relationships

A conceptual overview of the potential stakeholders involved in supporting the implementation of the matching grants to CIGs is provided below. This is followed by a brief presentation of the roles and responsibilities of the respective institutions.

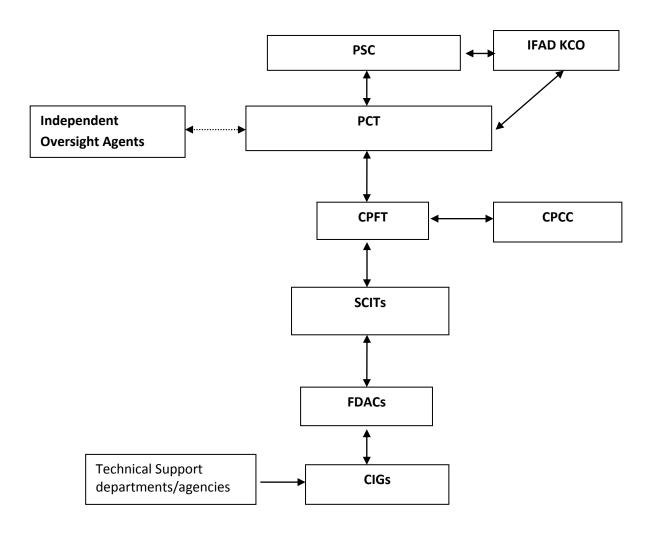

Figure 1: Institutions in Matching Grants Administration

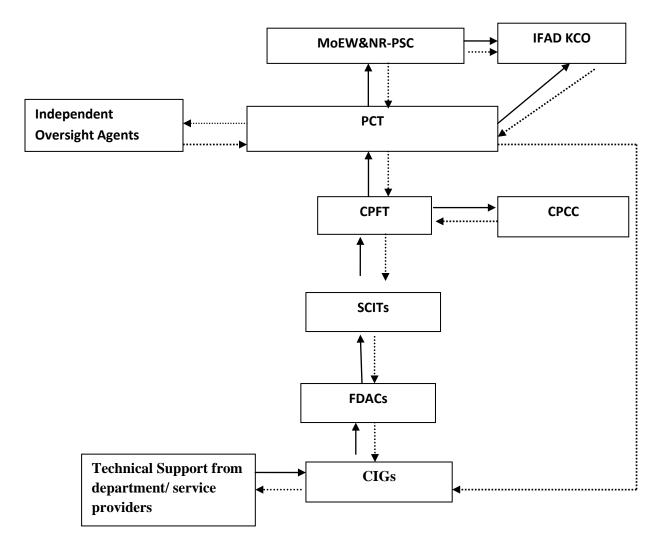

Figure 2: Flow of Information among the Institutions

3.2 Roles and Responsibilities of Common Interest Groups (CIGs)

The members of the respective CIGs are the direct beneficiaries. The CIGs are represented in the respective FDACs The CIG and its members are the recipients of financial grant resources provided to support Income Generating Activities for livelihood improvement and conservation of environment.

The CIGs are responsible for:

- i) Electing their officials as per their by-laws and constitution;
- ii) Attending all meetings and contribute to the activities of the group in accordance with its by-laws and constitution;

- iii) Writing proposals for funding;
- iv) Ensuring that the required community contribution is provided;
- v) Procurement of goods and services;
- vi) Accounting for financial and material resources;
- vii) Implementing the activities in accordance with the rules specified within this manual;
- viii) Attending trainings as required by this manual;
- ix) Monitoring the activities of the group and preparing regular reports as required by this manual. (Either monthly/quarterly/annually or as per milestones).

The management structure of the CIG will reflect the structure presented below to support the separation of roles and responsibilities and to ensure necessary checks and balances in support of transparency

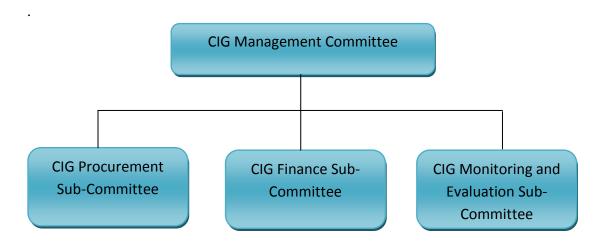

Figure 3: CIG Sub Committees

Each of the subcommittee has its own roles and responsibilities, which are defined below:

3.2.1 The CIG Management Committee

The management committee is composed of the Chairperson and his/her deputy, treasurer, secretary and his/her deputy and a few committee members.

Their responsibilities include:

- i. Ensuring group meetings are held as per their by-laws and constitution;
- ii. Overall oversight and management of the funded activities;
- iii. Approval of budget;
- iv. Ensuring funds received are properly accounted for and there is value for money, and that

- v. Ensuring that once they are informed that their CIG has been provisionally selected as a recipient of funds under the UTaNRMP matching grants, they will fulfill the requirements within the specified time and
- vi. Adhere to the activity (work) plan and budget.
- vii. Ensure all activities go beyond the implementation period

3.2.2 The CIG Procurement Sub-Committee

They are responsible for:

- i. Sourcing for suppliers of goods and services;
- ii. Requesting, receiving and analyzing/ evaluating quotations from not less than three suppliers;
- iii. Awarding or recommending evaluation results to the management committee;
- iv. Ensuring that items procured are of high quality and right quantities;
- v. Ensuring that items once procured are inspected, recorded, stored, issued and utilized;
- vi. Maintaining adequate records.

3.2.3 The CIG Finance Sub-Committee

They will be responsible for:

- i. Preparing the itemized budget;
- ii. Authorizing all financial transactions;
- iii. Giving independent reports on the usage of funds during group meetings,
- iv. Prudent financial book keeping;
- v. Safety of bank account and cash balances; and documents
- vi. Ensuring that all financial records are up to date to facilitate any audits;
- vii. Preparation of a statement of the accounts on a monthly basis;
- viii. Ensuring that the information relating to the utilization of funds, amounts paid and to whom, are available to the members of the CIG.
- ix. Fund raise for more funds to sustain the activities funded by the project

3.2.4 The CIG Monitoring and Evaluation Sub- Committee

The committee will be responsible for:

- i) Monitoring the use of funds and other inputs;
- ii) Ensuring implementation milestones are on schedule;
- iii) Ensuring high standards of works and services;
- iv) Providing independent reports as required;
- v) Ensuring all information including that which is relevant to the other sub-committees is publicly available, discussed and displayed;

3.3 Key Technical Departments/ Service Providers

A number of key departments whose technical support to the CIG's is fundamental to the success of the implementation of the grants include:

- i. State Department of Agriculture;
- ii. State Department of Livestock
- iii. State Department of Cooperatives;
- iv. State Department of Water;
- v. Department of Irrigation;
- vi. State Department of Fisheries
- vii. Department of Social Development;
- viii. National Environment Management Authority (NEMA);
- ix. Kenya Forest Service (KFS);
- x. Kenya Wildlife Service (KWS);
- xi. Water Resource Management Authority (WRMA);
- xii. Kenya Agricultural and Livestock Research Organization (KALRO)

Each of the departments/agencies will be responsible for:

- i. Providing technical advice and know how as appropriate in relation to the scope and content of the proposed project activities;
- ii. Acknowledging / endorsing the proposals in the application process,
- iii. Providing support, including technical advice at all stages of activity implementation and
- iv. Reporting on the progress of the funded activities including funds utilization- the reports should be to the PCT and the County Project Coordinator.

3.4 Focal Development Area Committees (FDACs)

The FDAC is a community representatives committee elected to oversee the planning, implementation, monitoring and Evaluation of UTaNRMP activities within a Focal Development Area. The FDA's are sub-sets of WRUA's with a population of 800-1200 Households

The roles of FDACs include:

- i. Mobilizing communities (CIG's) within the FDA to write proposals in conformity with the developed Community Action Plan;
- ii. Endorsing the written proposals;
- iii. Coordinating implementation of all project activities,
- iv. Keeping minutes and records of all their meetings and proceedings,
- v. Conflict resolution within the CIG members,
- vi. Ensure sustainability of funded projects,
- vii. Continuously plan for the way forward on behalf of the community,
- viii. Accounting for monitoring funds received from UTaNRMP,
- ix. Ensuring financial resources are used for the planned activities by the CIGs,
- x. Monitoring implementation milestones and submitting quarterly reports to WRUAs/ CFAs and sub county/ county technical teams.

3.5 Sub county Implementation Teams (SCITs)

Sub County Implementation Teams (SCITs) is composed of Government technical departments/agencies charged with responsibilities of planning, overseeing implementation and monitoring project activities at the sub county level.

SCITS will be responsible for"

- i. Ensuring there is adequate mobilization and publicity of the matching grants
- ii. Technical support to CIG during proposal development
- iii. Screening to ensure the proposal are in line with county integrated development plans
- iv. Support implementation of the proposals that have been funded.
- v. Quarterly monitoring of the implementation milestones and submitting reports CFPT

3.6 County Project Facilitation Teams (CPFT)

County Project Facilitation Teams is composed of Government technical departments/agencies charged with responsibilities of planning, overseeing implementation and monitoring project activities at the county level.

CPFT is composed of County Project Coordinator; County Ecosystem Conservator; County Director of Water Services; County Director of Environment; County Director of Agriculture; County Director of Social Development, County Director of Planning; County Director of Veterinary Services; County Director of Livestock Production; County Director of Fisheries; County Commissioner of Cooperatives; County Accountant- National Government and County Auditor- National Government.

CPFT will be responsible for:

- i. Ensuring there is adequate mobilization and publicity of available funds and requirement for the grants to ensure equity and fair geographical/enterprises distribution;
- ii. Receive and consolidate the county proposals;
- iii. Initial screening to ensure harmonization of activities within the county to avoid duplication of activities from different stakeholders;
- iv. Forward their recommendations to PCT and inform CPCC;
- v. Communicating the approved proposals to the respective CIGs through SCITs and FDACs;
- vi. Coordinating capacity building of the CIGs whose proposals have been approved;
- vii. Quarterly monitoring of the implementation milestones and submitting reports to PCT and CPCC.

3.7 County Project Coordination Committee

County Project Coordination Committee is the county policy organ responsible for:

i. Giving policy direction on county development priorities to all stakeholders;

- ii. Harmonization of activities within the county to avoid duplication of activities from different stakeholders'
- iii. Approving county AWPBs

CPCC is composed of: county executive member responsible for: Water and Environment(chair,) County Commissioner, County Chief Officers/directors responsible for Agriculture, Livestock, Fisheries, Social services, Planning, Cooperatives, County Project Coordinator, WRUA representative, CFA representative and any other coopted members.

3.8 Project Coordinating Team (PCT)

PCT will be responsible for:

- i. Preparation and review of the grants manual;
- ii. Recruitment and signing of contract with the Independent Oversight agent;
- iii. Call for proposals;
- iv. Receiving of proposals and forwarding them to Independent oversight agent;
- v. Seeking relevant no objections from IFAD;
- vi. Disbursement of funds in a transparent manner;
- vii. Contracts and MOU's management;
- viii. Monitoring of implementation milestones;
- ix. Coordinate capacity building activities;
- x. Ensuring information required by the CIGs is available using various media;
- xi. Compiling and disseminating relevant reports;
- xii. Maintaining a database of project implementation and sharing with all stakeholders;
- xiii. Periodic review of PIM.

3.9 Independent Oversight Agent

The agent will be responsible for:

- (i) Receiving proposals from the PCT;
- (ii) Appraising (desk and field) of proposals as per the guidelines in this manual;
- (iii) Geo-referencing of all CIGs that have qualified for field appraisal;
- (iv) Recommending to PCT proposals that qualify under various phases for funding and a report on those that do not qualify with reasons;
- (v) Monitoring implementation milestones and recommending subsequent phase funding or any other action;
- (vi) Undertaking risk management to mitigate financial loss;
- (vii) Maintaining the database on the status of all proposals;
- (viii) Compiling progress reports as per the TOR

3.10 Project Steering Committee (PSC)

The PSC will be responsible for:

- i. Giving policy direction and guidelines on national development policies and priorities;
- ii. Reviewing, approving and making subsequent reviews of this grants manual;
- iii. Periodic review of the PIM;
- iv. Reviewing and approving AWPBs;
- v. Ensuring the role and functions of the respective stakeholders are adhered to;
- vi. Overall performance of the project; and
- vii. Recommending to the donor any relevant implementation changes to ensure achievement of the project goal.

3.11 International Fund for Agricultural Development (IFAD)

The International Fund for Agricultural Development will be responsible for:

- i. Reviewing and approving this grants manual and any subsequent reviews;
- ii. Reviewing and approving AWPBs;
- iii. Giving various no objections and
- iv. Supervision and implementation support.

4 MATCHING GRANTS FINANCING, GOVERNANCE, ACCOUNTABILITY PROCESSES AND PROCEDURES

4.4 Introduction

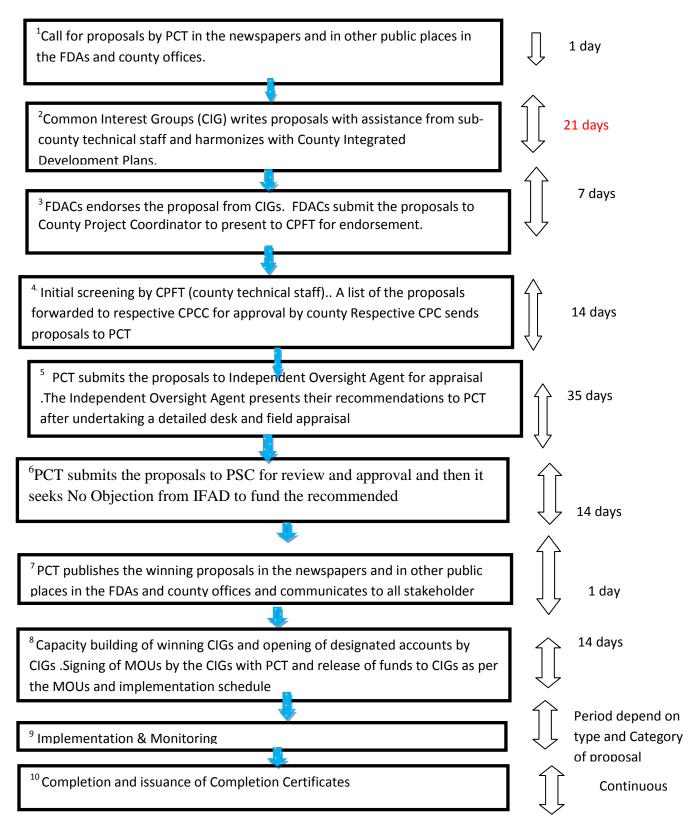

This chapter provides an overview of UTaNRMP Matching Grants financing, governance and accountability processes and procedures

4.2 Matching Grants Processes and Procedures

The matching grants scheme follows a defined pathway starting from when the CIGs develop their proposals. The proposals pass through several stages, each with its own role and relevance to the ultimate successful implementation. It is estimated that it will take 100 days before a successful proposal finally gets the green light to enter the implementation stage. Once implementation commences, monitoring of the CIG project is undertaken by the various teams to ensure successful implementation and upon completion, a completion certificate is awarded to the CIG.

The process is as depicted in Figure 4 below

Figure 4: Proposal Funding Process

Remarks: The total number of days for the preparatory phase i.e. step 1-8 is 98 days.

Explanatory notes to the Sequencing of Activities for Administration of the Grants

S/No	Activity	Sub activities	Time Frame (no of days)	Where
1	Call for proposal	PCT advertises in the media in a	1	PCT
	Can for proposar	newspaper with nationwide coverage and also writes posters which are distributed to all chairpersons of FDAs and pinned in noticeboards in public place such as churches, chiefs office schools within the FDAs, sub county offices, county etc		rei
2	CIGs writes proposals	CIGs write proposal with technical input from relevant technical department for process of harmonization with County Integrated Development Plans	14 21	Focal Development Area
3	Endorsement of proposals by FDAC	FDAC verifies if the CIG falls within the FDA FDAC endorses the proposal as appropriate by signing and stamping with FDA rubber stamp	7	Focal Development Area
		-	1.4	
4	Endorsement and initial screening by county and sub county office	Receipt of proposal by CPC Initial screening done by CPFT to conform with CIDP Endorsement sub county and county relevant staff	14	County and Sub county
		Signing by county project coordinator of the proposals Presentation to CPCC for concurrence Forwarded to PCT by CPC		
5	Appraisal(both desk and field)by Independent Oversight Agent	PCT receives the proposal from the counties Records them and forwards to Independent Oversight Agent for appraisal (both desk and filed) Independent Oversight Agent undertake detailed desk review for all the proposals	35	PCT AND FDAs

		received and generate a report of proposals suitable for filed verification. Conducts field verification for proposals that have been qualified at desk review Compile a report of CIGs who have qualified for award of grants and present the report to PCT The report is discussed and consensus of the proposed CIGs awarded the grants		
6	Approval by project steering committee / IFAD	PCT presents the report of recommended CIGs to PSC for approval The approved list is forwarded to IFAD for review and concurrence and no objection IFAD gives a no objection for the approved list	14	Nairobi /IFAD office
7	Notification of successful and unsuccessful of grants awards in newspapers	Publish the list of the winning CIGs in the newspapers. Send a list of successful and unsuccessful CIGs to all chairpersons of FDAs, CPC and DSDOs	1	PCT
8	Capacity Building of the Successful CIGs	Training is done to all successful CIGs at the county level on; financial management ,procurement and governance issues Groups open designated bank accounts Signing of MOUs between PCT,CIG and FDAC Funds are released based on milestones	14	COUNTY
9	Implementation of the proposal	CIG implements the approved projects Monitoring by IOA and recommendation for release of funds in tranches	Maximum for one year for category A and B while for category C	FDA

			might be more than one year	
10	Completion and award of completion certificate	Verification done by IOA, technical department and FDAC. The CIG is awarded a completion certificate	Continuous	IOA/FDA/ PCT

4.2.1 Call for proposals from Common Interest Groups (CIG)

The advertisement will be posted in print media with national coverage, project website, posters and announcements through public institutions .e.g. Schools and Churches. This is to ensure general awareness amongst the WRUAs/ CFAs/ FDACs, CIGs and general public of the opportunity existing to apply for the grants. Advertisement document will provide clarity to CIGs on:

- i. Eligibility criteria;
- ii. Prioritization criteria and their application;
- iii. Eligible activities;
- iv. CIGs Contributions;
- v. Funding levels, utilization and the consequences of misuse of funds;
- vi. Anticipated funding cycle.

It is anticipated that calls for proposals will be made twice a year. The Calls for proposal will be public with clear deadlines. The draft advertisement and content of the media release are found in **Appendix 1, F1, Call for proposals**.

4.2.2 FDACs Level

The CIGs will present their proposals to respective FDAC for endorsement. The FDAC's will forward to the respective County Project Coordinators. This stage is aimed at ensuring ownership by the FDACs, and counties

4.2.3 County Project Coordinator's Office Level

The FDACs will present the proposals to the County Project Coordinator for submission to respective CPFT members for endorsement. A list of the proposals categorizing thematic areas will be presented to CPCC for concurrence and the County Project Coordinators will submit the proposals to PCT

4.2.4 PCT Level

- i. Receive the proposals;
- ii. Submit the proposals to the Independent Oversight Agent for appraisal
- iii. Submits the proposals to PSC for review and approval
- iv. Seek "No objection from IFAD for the recommended proposals by the Independent Oversight Agent after securing PSC approval;
- v. Give a feedback to the successful CIG's and other stakeholders through advertisements in the public media;
- vi. Coordinate capacity building for the successful CIG's;
- vii. Contracts signing (between PCT and CIG's) and management;
- viii. Disbursement of funds; and
- ix. Feedback to groups on rejected proposal indicating reasons for rejection.

4.2.5 Independent Oversight Level

The PCT will present the proposals to a competitively recruited Independent Oversight Agent who will:

- i. Receive proposals from the PCT;
- ii. Carry out screening and desk review of proposals as per the guidelines in this manual;
- iii. Conducting field verifications and appraisals as per the guidelines in this manual;
- iv. Recommend and forward to PCT the proposals that qualify with specific phases for funding;
- v. Generate a database on all the proposals;
- vi. Forward to PCT all the rejected proposals.
- vii. Carry out monitoring of milestones based activities and recommend tranche releases

4.2.6 IFAD level

The PCT will present the oversight recommendations to IFAD who will:

- i. Receive and review the recommendations;
- ii. Give "No objections" on the approved proposals for funding.

4.2.7 Training for Line Ministry/ Agency Staff

The Roll-Out training (refresher training annually) for the line Ministry/Agency staff, using a training module defining the schedule of related activities will be used (as provided in **Appendix2, TM1**). The training includes:

- i. Eligibility criteria
- ii. Prioritization criteria and their application
- iii. Eligible activities
- iv. Roles and responsibilities of stakeholders
- v. Financing processes and levels
- vi. Governance framework and Risk mitigation plan
- vii. Cross cutting issues including HIV/AID, Gender and environmental conservation.

4.3 Categorization of CIGs Activities

There will be various categories of CIG projects to be funded under the matching grants category of the loan. All projects to be funded must contribute to improvement of NRM. The activities will vary in size, costs, type, and duration of implementation, similarity, uniqueness and complexity.

Category A: Standard IGA activities Category B: NRM Special activities

Category C: Unique

Category A includes IGAs that contributes direct benefits to the households in terms of income and food security as well as contributing to NRM. These include: Poultry farming, Dairy improvement, Fish farming, Crop production, Tree nurseries, AI services, and support services to NRM activities .e.g. (Agro vet), Small stock improvement (.e.g. dairy goat, rabbits), bee keeping tree nurseries and emerging enterprises.

These activities will be supported through standardized Technical Support Notes (TSN) and other support notes that will help to standardize: items, units, unit costs and quantities. In relation to this category a simple "shopping list" of options with pre-defined quantities and unit costs is found in **Appendix4 as Technical Support Notes.** The proposal should meet the minimum thresholds for IGAs in specific thematic areas. The "shopping lists" of options will be reviewed annually.

These activities will be funded in the ratio of 70% by the grant and 30% by CIGs. However, special consideration will be given to CIGs mainly composed of the **youth and vulnerable persons** (.e.g. visually impaired, physically challenged, hearing impaired). These CIGs will be funded in the ratio of 90% by the grant and 10% being the CIG contribution because of the nature of their disability and their inability to raise the minimum requirement of 30% under this category. However in special circumstances 10% community contribution may be waived on case by case basis depending on the level vulnerability.

Category B includes special NRM activities that have direct benefits to the CIGs but contribute to the overall environmental conservation. The benefits to the CIGs are long term in nature and cannot be pre-quantified. These activities require the efforts and participation of all members of the CIG .e.g. Soil and water conservation, community NRM (River bank & road conservation, gulley hilling, eco toilets, energy saving technologies, hotspots conservation, and alternative energy sources).

These activities will be funded in the ration of 90% by the grant and 10% by CIGs. The funding of proposals for this category will be on a case by case basis since it is a challenge to come up with standardized bill of quantities.

Category C includes activities that meet CIGs' specific needs. The activities require specialized technical inputs, have a wider coverage in nature, may require high initial capital investments, have high returns per unit costs and their benefits are widespread. Some of these activities include green energy, value addition, and micro- irrigation schemes.

These activities will be funded in the ration of 70% by the grant and 30% by CIGs. The funding of proposals for this category will be on a case by case basis since it is a challenge to come up with standardized bill of quantities.

4.4 Eligibility Criteria

This section enumerates the criteria which CIGs must meet for them to be funded.

4.4.1 General Criteria

The CIGs must meet the following conditions:

- **i. Registration:** The CIG must be registered with a government institution and have a current registration certificate. The group must have been in existence for the last six months.
- ii. **Current Membership:** The CIG must have a minimum **of 15 individual active members** to ensure that there are enough members for various sub committees and benefits are widespread. However for the vulnerable category, a minimum of seven (7) members is acceptable..
- iii. **Names of Management Committee:** The CIGs must provide the names and signatures of not less than three of its management committee members when submitting the proposals.
- iv. **Line department/agency acknowledgment:** The proposals must be endorsed by the line technical department/agency.
- v. **Bank account: the CIG must have a bank account** and attach a copy of the most recent bank statement covering the last six months

- vi. The CIG must be from a FDA which is within the project area.
- vii. The CIGs must give a statement that the proposal is not being funded by another agency;
- viii. The CIG members must not have been involved in any fraudulent activities.
- ix. The CIG executive members must not have integrity issues as per chapter six (6) of The Constitution of Kenya (2010).

4.4.2 Criteria for First level funding

Apart from the criteria outlined in section 4.4.1, the CIGs must also meet the following conditions:

- i) Apply for the funding in a specified proposal forms;
- ii) Seek relevant technical advice with evidence of endorsement
- iii) The activity to be funded must be relevant to the UTaNRMP objectives;
- iv) Meet the specified CIG contribution;
- v) Endorsement by the relevant community institutions;
- vi) The proposed activity must be within the specified category of ceilings;
- vii) The proposal must be endorsed by all CIG members with copies of their national identity cards attached;
- viii) The CIG must be willing to abide by the provisions of the project;
- ix) Provide Activity Business Plan: Attach to the proposal a detailed business plan of the enterprise/activity.

4.4.3 Criteria for the subsequent Funding

The activities for subsequent funding should be based on value addition, up-scaling, market support, support services to NRM activities related to earlier funding.

The CIGs funded previously, can apply for the second funding if they meet the following:

- i. Must meet the general criteria under 4.4.1above;
- ii. Must meet the criteria for first level funding as in 4.4.2 above;
- iii. Must have successfully implemented the activities of the first level funding and issued with a completion certificate; and
- iv. Must provide Activity Business Plan: Attach to the proposal a detailed business plan of proposed CIG enterprise/activity

4.5 CIG Activity Criteria for Funding

The activities under the UTaNRMP matching grants to CIG's should have positive impact on natural resources.

Table 4.1: Categories of Proposals

No	Category	Activity Characteristic	
1	Category A- Standard	Short time to implement (within 12 months)	
	IGA Activities	Contribute to household incomes	
		Contribute to food security/Nutrition	

		 Improves NRM May be innovative in nature Community contribution will be 30% of the total cost of the proposal and 10% for CIGs composed of youth and vulnerable persons (Refer to section 4.3) In special circumstances, community contribution may be waived on case-by-case basis. Funding ceiling of up to Kshs. 2.0 Million
2	Category B- NRM Special activities	 Contribute to the overall environmental conservation. The benefits to the CIGs are long term in nature and cannot be pre quantified Requires participation of all CIG members Covers a bigger geographical area May be innovative in nature Implementation period may be more than 12 months Funding ceiling of up to Kshs. 2.0 Million
3	Category C-Unique	 Must be innovative in nature Require specialized technical inputs, Have a wider geographical coverage in nature, May require high initial capital investments, Have high returns per unit costs and their benefits are widespread. May involve more than one CIG May be innovative in nature Implementation period may be more than 12 months Funding ceiling upto 2.0million

4.6 Community Contributions

Community contribution will vary according to the categories. Community contribution will be in form of

- i. Cash
- ii. Unskilled and skilled labour
- iii. Materials
- iv. Combination of all cash, skilled and unskilled labour and materials.

The contributions must be quantified in the proposal and must be availed before the projects matching grants are availed to the CIG's.

Category A: The community contribution for this category will be a minimum of 30% distributed as follows;

- i. Cash-10%
- Unskilled and skilled labour 20% ii. iii. Materials

The community contribution for youth and vulnerable groups will be a minimum of 10% distributed as follows;

i. Cash Unskilled and skilled labour > 10%ii. Materials iii.

The respective contribution in terms of cash, labour and material will be determined on case to case basis and in some instances the project may support the proposal up-to 100% depending on the vulnerability of the group.

In cases where labour and materials cannot be raised due to the nature of the project ,e.g procurement of equipment's, CIGs will be required to contribute their 30% in Cash

Category B: The community contribution for this category will be a minimum of 10% distributed as follows:

- i. Cash-3%
- Unskilled and skilled labour

 Metariols ii. iii. Materials

Category C: The community contribution for this category will be a minimum of 30% distributed as follows

- i. Cash - 10%
- Unskilled and skilled labour 20% ii.
- iii. Materials

4.7 **Appraisal Criteria**

The desk and field proposal appraisal forms with Check List and Scoring by the Independent Oversight agent are shown in appendix1, F3.

The following conditions must be met:

4.7.1 Training

The successful CIGs will undergo initial intensive trainings before release of funds. Before the CIGs implement the activities, CIG members will undergo a training session on grants implementation modalities. The thematic areas to be covered in the CIG trainings includes: CIG induction on implementation modalities, Financial Management, Governance and procurement. The training modules are attached in the **appendix 2.**

4.7.2 Transfer of funds

The following conditions must be met by the CIGs before funds are disbursed:

- i) The latest bank statement of the UTaNRMP designated bank account (current account) showing their cash contribution. The account must have UTaNRMP on the account name.
- ii) Activity Implementation Plan including training schedules;
- iii) Full Names, mobile and contact details of: Chairperson, members of the Management Committee and members of the various sub-committees (Procurement, Monitoring and Finance)
- iv) Community Groups' postal and physical address, mobile number, and email addresses
- v) Signing an MOU between the CIG and FDAC.
- vi) Signing of contract between the CIG and PCT.
- vii)Launch barazas will be done in the respective FDAs to all CIGs awarded the grants to sensitize them on grants conditions, implementation modalities etc The occasion will be used to sensitize the public on funding mechanisms for UTaNRMP and how communities can participate in project activities. The county and national government representatives and line agencies will be invited to the occasion.

Once the contracts have been signed, PCT will prepare payment and transfer the funds either through cheque or EFT to respective CIGs accounts as per the agreed milestones (**Appendix F3.2**). All key relevant stakeholders (CPC, FDAC etc) will be informed when each tranche is given to the group to enhance transparency.

4.8 Implementation Modalities

4.8.1 Technical training

Technical training modules are attached in **Appendix 2**detailing the time schedules and curricula to be covered. The trainings will be undertaken concurrently with project implementation. The technical training budget will be part of the proposal.

The standard rate of remuneration for technical support in relation to all trainings (as per government rates) is:

- Kshs.1,500 per person per day
- Kshs. 1,000 per day for vehicle fuel Kshs. 400 per day for motorcycle fuel
- Kshs. 750 per day for driver, if required
- Kshs. 3,000 for Training materials(optional)

The type of technical support required will be naturally influenced by the nature of the activities proposed. The project has developed training curriculum for selected enterprises

4.8.2 Supervision and Monitoring

a. FDACs

A total of 3% of the cost of all proposals by CIGs will be allocated to respective FDACs for supervision, monitoring and reporting. These funds will be sent to the respective FDACs by the PCT.

The grant will be provided in tranches in respect to monitoring and reporting on the respective activities. The amount will be part of the project funds under matching grants category and not funds from CIG proposal.

This amount should be considered as revenue for services provided/to be provided in support of the implementation process. A separate bank account for receipt of the funds will be required. The fund utilization will be audited in accordance with the regular audit requirements of a legally registered organization. The FDACs are however required to prepare a monitoring plan and share with the PCT for concurrence before funds are disbursed.

b. Line Ministries/Departments

In addition to technical support the line ministries will be offering to the CIGs, they will also be required to carry out supervision and monitoring of CIG activities. Respective departments within the counties will be expected to include this activity in their budgets. The monitoring will be done on a quarterly basis and reports submitted to the PCT.

c. Independent Oversight Agent

Supervision by the independent oversight agent will be done as per milestones in various proposals from the CIGs. The oversight agent will be expected to have a copy of the implementation plan from each of the CIGs which will have been jointly prepared with clearly defined milestones. This activity will be important for synchronizing milestones to funds disbursement. All the reports will be forwarded to the PCT.

d. Project Coordinating Team

The PCT will be monitoring and evaluating CIG activities regularly and make timely decisions on the administration of grants, document and share lessons learnt with stakeholders. The PCT will also monitor and evaluate the performance of FDACs and the Independent Oversight agent. The PCT will be carrying out periodic studies to assess the progress towards achievement of project objectives.

4.9 Annual Case Studies

The PCT will continuously document case studies to help in lessons learning. Reference **Appendix 1, F5, F5.7 and F 5.8** (Lesson learnt and case study templates) will provide valuable insight into the process supporting improvements to the matching grants system. The case study will flag out cross-cutting issues touching on gender, HIV/AIDS, environment, transparency and accountability, service delivery, empowerment and equity among others. This will also inform the decisions PCT will make regarding the administration of grants.

4.10 Award of Completion Certificate

A project is deemed to be complete when a Certificate of Completion has been issued by PCT with the recommendation from the Independent Oversight Agent. The format for the Completion Certificate is as shown in **Appendix 5**, **OF4**: Completion Certificate.

The process of preparing and submitting the Completion Certificate is as follows:

- i) The CIG sends a request for final inspection of its project to relevant technical office(s) supervising the implementation with copies to FDACs;
- ii) The relevant technical office(s) carries out the inspection and fills the Completion Certificate forms once certified that the outputs have been achieved;
- iii) The Completion Certificate forms are endorsed by FDACs, CPFT and the independent oversight agent;
- iv) The endorsed completion certificate forms are forwarded to PCT for issuance of completion certificate; and

The Completion Certificate will be issued to CIGs in a public gathering organized by the FDAC; Projects that have not been issued with a completion certificate within 1 month after the date of planned completion will be followed up by the Independent Oversight Agent.

4.11 Governance Framework

4.11.1 Transparency

All activities relating to the matching grants will be implemented in open and transparent manner. The activities to be funded will originate from the Community Action Plans (CAPs) developed through the PRA process to address the community felt needs. All the communities and stakeholders within the project river basins will be sensitized on the availability of grants to ensure that there is equity during application for the grants.

In order to ensure that the CIGs are involved in project cycle (Initiation, planning, implementation, monitoring and Evaluation) UTaNRMP will use barazas, churches, mosques, print and electronic media targeting intended beneficiaries. This will ensure enhanced disclosure

of information to all interested groups to ensure participation and reduce the chances of collusion.

The project has developed detailed process and procedures for the CIGs to access the grants. These include; Call for proposals, eligibility criteria, screening, appraisal of proposals, public announcement of the successful proposals, funding mechanisms and implementation modalities through this matching grants manual which is a public document.

The project will issue cheques and Completion Certificate to the funded CIGs in a public function organized by the respective FDACs.

4.11.2 Accountability

The ownership and accountability of the grants to CIGs will be the sole responsibility of the respective CIG members. UTaNRMP will competitively procure an Independent Oversight Agent that will appraise proposals, recommend funding, monitor and verify milestones in order to give an independent and professional opinions on grants administration.

Various stakeholders have been given clear roles and responsibilities in the administration of the matching grants. The CIGs will be funded in phases according to agreed milestones which will be verified by the Independent Oversight agent. The minimum number of CIG members is set at 15 members to ensure that respective sub committees (Finance, Procurement, Monitoring and Evaluation) are independent and have enough members to check the executive.

The CIGs will sign MOUs with FDACs for implementation support and sign contract with PCT for funding and acceptance of responsibility and liability for funds received. The CIG management will be held personally and collectively responsible for the funds received.

The FDACs will be funded to carry out M&E effectively and will be held responsible for the CIGs under their supervision in order to ensure that the funds received are properly spent and accounted for, in order to get value for money.

CPFT will be funded by the PCT to carry out supervision and monitoring of CIG activities to ensure effectiveness and efficiency in utilization of funds. CPFT feedback will be send to PCT for timely decision making and necessary backstopping. A register indicating the type of technical advice given to a group by the technical officers will form part of the monitoring.

PCT will be responsible for the management of project funds in terms of disbursement of the funds to CIGs upon signing of contracts, contract management, recruitment and Supervision of Oversight agent and backstopping of various implementing and monitoring agencies. No funds will be disbursed to the CIGs without professional recommendation from the oversight agent and no objection from IFAD. The PCT will also be responsible for accounting of project funds to the various financiers.

The project funds will be allocated fairly and competitively among the CIGs based on agreed CAPs and conditions (e.g. contribution percentage 30/70% depending on category) and the allocation of funds and their utilization must be within approved AWPB.

4.11.3 Fiduciary Aspects

Fiduciary risk means the risks of monies being misused when funds are transferred from one party to another for a specifically agreed purpose. All parties must ensure that the party receiving the funds, in this case the CIGs will ensure that the following conditions are met:

- i) The funds are used properly and accounted for;
- ii) The funds are used for the intended purpose;
- iii) The use of funds results in value for money;
- iv) That the accounting records and related transactions are maintained.

The capacity of the CIGs to keep proper books of accounts and account for funds received and used is a pre-requisite to the development of proper financial systems which empowers the groups to receive funds and manage their own development. Emphasis will be placed on ensuring the provision of necessary tools and systems which support accountability.

4.11.4 Reduction of Fiduciary risks

The project will ensure that the CIGs are capacity built on financial management skills to ensure proper record and book keeping which will lead to prudent utilization of project funds. The CIGs will have an independent financial subcommittee which will ensure prudent utilization of funds.

The CIGs will be funded in tranches as per the agreed milestones in the contract. The CIG milestones must be assessed by the Independent Oversight Agent before any subsequent tranches are released. FDACs will be carrying out monitoring visits to the CIGs to assess implementation progress as per agreed activity plans. The project funds will be audited by internal auditors at the counties and KENAO. IFAD will continue to offer supervision and implementation support to the project.

4.11.5 Complaints Handling Mechanism

Apart from the internal mechanisms of handling complaints within the CIGs, FDAC, the project will establish a CPFT complaint subcommittee composed of: Social Development Office (Chair); County Project Coordinator and the relevant county implementing department/ agency from which the CIG with the complaint falls and any other co-opted member up to a maximum of five (5).

In addition, a copy of all the complaints reported at the County Complaints Subcommittee shall be forwarded to the PCT for information and relevant action. The PCT shall set up complaints box and register where complaints will be dropped and registered .PCT will establish a subcommittee to handle all the complaints

4.11.6 Sanctions and Remedies

These are the actions that will be taken when funds are reported or suspected to have been misused by the CIGs:

- a) Stop all the withdrawals from the CIG account by the Sub -County SDO;
- b) No further project proposals will be awarded or received from the CIGs in the respective FDA, where misappropriation is reported;
- c) PCT shall request the internal audit department at the county to audit and investigate the CIG and share the report with the CPFT and PCT complaints subcommittees;
- d) Recovery- the CIG account signatories will be required to refund the misappropriated funds within 2 weeks after audit;
- e) If the funds are not paid within the stipulated time, FDAC monitoring funds will be used to recover the loss; and
- f) Prosecution of culpable culprits.

4.12 Alterations and amendments to this manual

This manual is a living document and will from time to time be reviewed to support its effective and efficient application. Once approved by the PSC and IFAD, the manual will be posted on the project website. Any contextual changes to this manual shall be approved by PSC and IFAD as may be necessary and the revised version (bearing month and year) shall be posted on the project website as well as making it available for public distribution.

5.0 FINANCIAL MANAGEMENT AND PROCUREMENT

This chapter provides guidelines for planning and managing procurement and financial aspects by CIGs, and similar civil society groups benefiting from the project finances.

5.1 Introduction

The aim of this chapter is to: Provide the basic financial and procurement guidelines for use by various stakeholders who are managing the community projects; put in place systems and policies that will safeguard the projects resources/assets; simplify the process of procuring and producing financial information/reports; enhance the financial and operational performance; improve accountability to all external parties including government, IFAD, auditors and other stakeholders; enhance Community members' participation in applying scarce resources; prepare the beneficiaries for long-term financial sustainability and provide a reference material for community members and other interested parties.

5.2 General Provisions

Community members shall not only choose local development activities to be funded, but they will also be directly engaged in the management of program funds and implementation processes. It is envisaged that such engagements will lead to more effective community organization, with developed capacity for community planning and management, and the improvement of relationships with government and other development agencies.

These guidelines on procurement and financial procedures and processes are meant to present procurement and financial management perspective. In this case, the users include CIGs in Community Driven Development organizations and Common Interest Groups (CIGS). It brings together good practices on procurement and financial management from on-going programs and presents the procedures and methods in a simple language.

This part of the manual is a "living document", to be updated continually on the basis of experience on the ground and to be used by anyone involved in projects/ programs who find them useful.

5.3 Financial Management and its relevance to Community Projects

The main purpose of the Financial Management guidelines is to provide simple tools to monitor, protect the financial, legal obligations and well-being of the Community Driven Project. The guidelines set out procedures for handling project finances, recording of financial information and ensuring that internal controls are well maintained.

5.3.1 Matching grants for UTaNRMP CIGs

CIGs funded by UTaNRMP must meet the following conditions:

i) Have valid registration certificate;

- ii) Comply with all guidelines, regulations, circulars or other forms of financial procedures in force by the project;
- iii) Abide by all internal control mechanisms put in place (operating through relevant committees Finance, Procurement, Monitoring etc.);
- iv) Meet their obligations as they fall due e.g. pay suppliers within the stipulated period;
- v) Maintain up to date inventory records, update their financial records on a regular basis (once a week is recommended);
- vi) Perform monthly reconciliations of their bank and cash balances, prepare regular financial statements e.g. receipt and payment accounts, asset register etc.;
- vii) Review and discuss, on a monthly basis, the financial status of the organization during members' meetings;
- viii) Present financial reports to the entire group during Annual General Meetings (AGM)

5.3.2 UTaNRMP Community Project Financial Management Principles

In order to achieve the objectives of effective financial management, the following principles should be observed:

- i) The funds will be allocated fairly and competitively among the CIGs based on agreed CAPs and other conditions as stated in this manual.
- ii) The allocation of funds and their utilization must be within approved AWPB;
- iii) The CIG members and their decision makers will be personally and jointly held responsible and accountable for the use of project funds;
- iv) In case the project funds are not spent within the budgeted period, the funds shall continue to be spent on the agreed activities the following financial year;
- v) The project funds should be spent optimally i.e. to achieve value for money;
- vi) The CIG members should be involved in all financial decision making before funds are committed (e.g. through meetings which should be evidenced by minutes and relevant committees); and
- vii) There should be in place strong internal control system enforceable by procedures, regulations and rules acceptable by all stakeholders.

5.3.3 Financial Management tools

For proper and effective Financial Management (FM) the process must be supported by necessary tools. Some of these tools are, rules and regulations, AWPB and M&E systems,. Budgets, procurement plans, approved Community Action Plan, CIG constitution, registration documents, the finance and procurement manual, , bank and cash reconciliations, internal and external audit reports, fixed assets register, Financial reports (monthly, quarterly, annual),

evaluation reports, etc are necessary tools for effective FM. Respective Committees members will trained on the above tools.

5.3.4 Budgeting

Budget is an estimate of the amount of money or other resources, including materials and labour, that a CIG plans to raise and spend for a set purpose over a given period of time. The budget should be Specific, Measurable, Achievable, Realistic and Time bound (SMART). Comparison of actual vs. budget is done after the end of every period. (Consider the budget as a tool you can use to gauge the success of your CIG project activities).

The CIG needs the budget so as to determine the resources it will require (from their own contribution and outside) in order to achieve its objectives and also for preparing funding request to cover expected expenditure. In order to prepare a useful budget, involve all CIG members who must ask themselves the following questions:

- i) Are the objectives of this project a priority? This must be in line with CAP objectives.
- ii) What specific activity (ies) will be required to attain these objectives? List key activity (ies) to be undertaken during the targeted period.
- iii) What resources will be required to enable us accomplish these activities? Identify the labour, and other inputs to be procured/ required for each activity to be carried out.
- iv) What is the cost of these resources? Cost all the activities and inputs listed above and summarize.
- v) Where can we source for the funding? Identify all sources of funds (Development partners, financial institutions and CIG own contribution) and the expected amounts.

It is proposed that CIGs be allowed to make variations in their budgets not exceeding 10% in any one budget line, so long as the total allocated grant is not exceeded without prior approval by the PCT.

The Expenditure control forms will be updated monthly by the treasurer and reviewed by the Chairperson of the Monitoring committee. (For Sample Expenditure control forms **see Appendix 3, FPF 5**)

5.3.5 Community Contribution

The funds for matching grants are expected from IFAD and GoK. It is a requirement that each CIG raises a minimum of 10%-30% or more of the total project costs depending on the category. This requirement may be waived in some special cases for youth and vulnerable members of the community. The waiver will be considered on case by case basis. Other forms of contributions include labour, materials, or other resources depending on the nature of the project. It is expected that each CIG will keep proper and verifiable records of all such contributions in a Community

Contribution diary. The finance subcommittee (comprising of Chairperson and at least 2 members) is responsible for maintaining the Community Contribution diary.

5.3.6 Funds Flow and Bank Accounts

Funds flow refers to the entire process of channeling funds right from IFAD, through National treasury lead Ministry(MoEW&NR)to the PCT account and ultimately to the designated community bank account. The funding of the respective groups falling within the focus of the CIGs will be provided in the form of direct grant financing based on the submitted and approved proposals by relevant authorities

The CIG shall open a **DESIGNATED BANK ACCOUNT** with a reputable commercial bank in the project area. This account must ONLY be for activities related to implementation of the proposed project. The signatories should include Chairperson, Treasurer and the Secretary and a mandatory signatory being a sub-county social development officer. The signatories from the CIG shall not be immediate relative to the other.

The signatories shall not withdraw funds from the Project bank account without a committee minutes from a meeting consisting of 2/3 of the committee membership and a letter from the relevant government department.

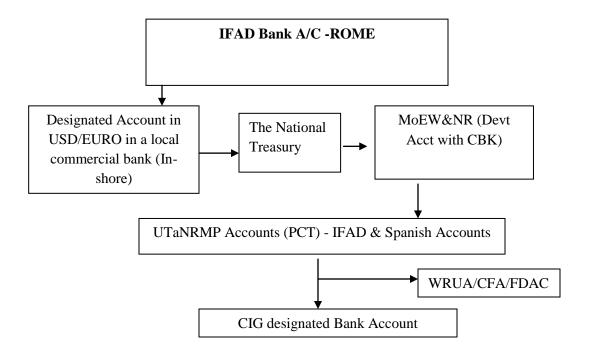

Figure 5: Flow of Matching Grant Funds

5.3.7 Payment of goods and services:

- i. The CIG can pay for the goods and services they have procured up to Kshs. 400,000.
- ii. Any payment exceeding Kshs. 400,000 will be paid to the supplier by the PCT upon receipt of certified documents from CIGs.

Financing contract signed with the CIGs will generally indicate how the funds are to be disbursed (.e.g. tranches), percentage of the funding, the length of the implementation period, and the eligible (approved) activities for financing. Disbursement percentages will be indicated in the approved project proposals; contracts and the subsequent payments will be based on periodical progress reports and verified milestones. For sustainability of the project, it is expected that community contributions will continue.

5.3.8 Valuation of community contribution in kind

The valuation method to be applied on contributions in kind will be output-based (.e.g. length of water piping laid) or input-basis (unskilled labour hours) depending on the nature of the activity.

5.3.9 Accounting

The accounting systems are expected to be basic and may be manual in nature. The treasurer is responsible for keeping and updating the accounting books and other financial records. Due to the nature of simple storage facilities available in the CIGs, the use of hard bound books is recommended as they are durable. Cash books will be used to record all financial transactions in a simplified way. Each cash book has a receipts and payments side with the following details:

Receipts Side

The receipts side of the cash book will include the following details

- Date
- Details from whom funds have been received
- Receipt number
- Amount received

Payments Side

On the payment side, details will include

- i. Date of the transaction
- ii. The payee (person or organization that is being paid)
- iii. Payment voucher number(reference no)
- iv. Cheque number
- v. Amount paid out

Receipts

The CIG Treasurer shall keep receipts for all expenses in proper order and also issue a cash receipt for the funds received. Receipts should be numbered accordingly and be kept safely. (For sample cash book see **Appendix 3, FPF 1**)

5.3.10 Payment Guidelines and Procedures

CIGs should pay their contractors, suppliers or service providers using the following procedures:

- i. The payment to be made exclusively for approved project activities based on budget allocation;
- Ensure all necessary supporting documents including work contract, payment certificates approved by relevant committee, cash receipts, invoice, LPOs, LSOs, delivery notes etc are available and valid.
- iii. Payment vouchers will be prepared by the CIG treasurer for all payments. (Sample payment voucher see **Appendix 3, FPF 3**)
- iv. Once the payment vouchers are ready, they will be passed on to the CIG Chairperson for review and approval.
- v. Cheques will only be drawn once the payment vouchers have been approved, and sent to the various signatories for signature. Payment should only be by cheque except for payments that are Ksh 10,000 and below for money to be drawn from CIG accounts, cheques must be signed by the chairperson, Treasurer and secretary.
- vi. CIGs should strictly use payment vouchers for reimbursable cost such as transport, lunch and technical support services expenses.
- vii. All expenditures are entered in the books of accounts and updated after every transaction viii. Monthly Bank statements are collected and reconciled with cash book
- ix. CIGs should provide monthly financial reports

How to effect payment

As to "when" payments are made, one of the following methods should be used:

- i. *Payments on delivery of goods or completion of services*. The total payment is done when goods/services has been delivered, inspected and accepted as per the contract.
- ii. *Installment payments*. This is a phased payment which should be made to the supplier/service provider only in accordance with the signed contract.

Note: As a general rule, payments made in cash will not exceed a value of Kshs. 10,000.00. All payments exceeding Kshs. 10,000.00 must be paid in cheque/EFT unless under special circumstances approved by the management committee.

5.3.11 Internal Controls

The capacity of the user groups to keep proper books of accounts and account for funds received and used is a pre-requisite to the management of grants. Emphasis will be placed on ensuring the development and provision of necessary tools and systems which support accountability. Some

of the weakness associated with community projects are weak accounting systems, in adequate financial management capacity and political interference.

In order to mitigate the above weaknesses, the following measures will be put in place

- a. A constant review of processes and transactions by relevant bodies so that risks of loss, fraud, inaccuracies or errors are noted at all levels, and measures put in place to eliminate or minimize them;
- b. Set up arrangements that accelerate the flow of funds or project implementation,
- c. Set a monitoring and evaluation system that integrates both financial and physical progress.
- d. Accountability should be in-built into the local governance system –publishing and publicizing of financial reports by CIG committees in most common local language;
- e. Undertaking internal audits of CIGs on a regular basis.
- f. Ensure security of vital documents by keeping them in filing cabinet or metal box.

5.3.12 Financial Reporting

Funds provided to communities are public resources and are subject to public accountability **Requirements:**

Submission of financial reports will be prerequisite to subsequent disbursement. Financial reports should show total actual receipts and expenditures compared against budget, with separate summaries of the sources of cash, available cash balances, related expenditures and variances.

CIGs should also prepare report on all assets and liabilities for the investment. Accompanying the financial report should be a simple narrative report on the physical progress of the project. Reports produced by CIG should be periodically reviewed by IOA, CPFT and PCT.

Public presentations of financial statements should also be done to enable beneficiaries scrutinize the use of funds. The following are the minimum financial records required for each CIG;

Cash Book: This book lists all of the receipts and payments made into and out of a particular designated bank account and should be updated per transaction.

Reconciliation Statements: The bank reconciliation statement compares the cash book balances against the bank statements and lays out the items that constitute the differences and should be done on monthly basis. (For sample Reconciliation Statements see **Appendix 3**, **FPF7**)

Statement of Source and uses of Funds: The preparation of periodic statements on the state of funds received and expenses incurred (simplified SOEs) is important tool in managing the resources of each CIG. The statements should be prepared on a monthly, quarterly and annual basis. A signed copy of these statements will also be forwarded to the PCT not later than two weeks after the end of the month, quarter or year to which they relate to (Sample statement of source and use of funds see **Appendix 3, FPF6**)

Asset Register: These may include livestock, boreholes and wells, farmland, business premises, irrigation machinery and so on purchased through grants. In order to maintain a proper and up to date record of all these assets, it is a requirement that each CIG keeps an asset register. A hard bound book or spreadsheet can be used for this purpose, and will include serial numbers (for machinery and equipment), date of purchase, purchase price, location, state of the asset and disposal dates. During the general members meetings, the treasurer will be required to provide an update on any changes that have occurred in the asset list.

Community Contribution Diary: This book will be used to record the community contribution. The following details will be recorded in the diary (Sample Community Contribution diary see **Appendix 3, FPF 2**),edit to fit the summary of the book

- Date of contribution
- Contributor's name
- Contributor's Identity card number
- Amount or Quantity of contribution
- Unit and Total costs
- Contributor's signature or thumb print

5.3.13 Auditing

To ensure accountability, communities should be encouraged to undertake their own audits in order to meet the requirements contained in the financing MoUs. The audits may be undertaken, at the request by PCT under special circumstances. By encouraging communities to undertake audits, governance and accountability are fostered.

5.3.14 Audit Checklist

A checklist of records and other documentation, which may be requested by the auditor, are provided below;

Table 5.1: Audit Check List

Ref	Group of Records	Description of Item
-----	-------------------------	---------------------

A	Primary Records	a) Cash book/petty cash book up-to-date to the year end.
		b) File of invoices/vouchers for all items of expenditure.
		c) File or book of receipts for all moneys received (or
		transferred).
		d) Bank statements, paying-in slips and cheque books
В	Summaries and	a) Summary of all receipts and payments by budget.
	reconciliation	b) Bank reconciliation statements for all bank accounts on a
	statements	monthly basis and at the year end.
		c) Petty cash reconciliation statement for each month and at
		the end of the year.
		d) Inventory sheets
С	Schedules	a) Schedule of creditors (money owed by the organization).
		b) Schedule of debtors (money owing to the organization).
		c) Schedule of grants or other income due.
		d) List of grants received, or expected to be received.
		e) Fixed assets register.
D	Other information	a) A letter from bankers to confirm balances (requested by
		auditors).
		b) List of all CIGS committees and their membership.
		c) Funding agreements, contracts and correspondence with
		donors.
Е	Financial Reports	a) Previous year audit report where applicable.
		b) Monthly, quarterly and annual income and expenditure
		statements made to members and partners.

5.3.15 Technical Assistance

CIGs will seek technical support from relevant technical government department. The cost of such services) will be included in the CIG's project proposal.

5.4 Procurement

5.4,1 Introduction to procurement management

Procurement may be defined as the process of acquiring or getting by purchase, hire purchase, hire, license, tenancy or by any other legal means-goods, works and services for an organization.

Procurement is a function that will support CIGs in the implementation of their project activities and is based on the idea that:

• Community development can only be achieved if the communities take direct responsibility of their projects mitigating activities; and

• The role of government and other agencies is to provide facilitative support.

This process requires to be done in a transparent and cost effective manner which facilitates the implementation of a project.

5.4.2 Use of this procurement manual

This manual shall be used:

- (i) To understand procurement management for community managed projects;
- (ii) To facilitate CIGs in managing procurement activities for their projects and
- (iii) As a training resource document.

In order to achieve the above, this section of the manual aims to:

- (i) Introduce key procurement concepts;
- (ii) Present procurement procedures in a simplified way; and
- (iii)Provide necessary forms and formats that can be used by a CIG as annexes.

5.4.3 Why a procurement Guide for CIGs?

A procurement guide ensures that:

- i) Resources needed to carry out the CIGs projects are procured with due attention to economy and efficiency (lower cost, best quality and timely availability);
- ii) CIG project activity funds are used to pay for resources needed; and
- iii) All suppliers have an equal opportunity to compete.

5.4.4 Procurement Principles(GOK and IFAD)

The following key aspects of procurement process are generally common to the Government and other donor procurement procedures:

- i) **Transparency, fairness and fraud prevention** are important so that everyone will know that funds are being honestly spent and accounted for;
- ii) Equal opportunity ensures that the suppliers/sellers are provided with equal opportunity;
- iii) **Economy and efficiency** (value for money) means that goods and services will be procured at a reasonable price and that the procurement planning process of is of satisfactory status;
- iv) Effectiveness means that the goods and services will fulfil CIG objectives.

5.4.5 Procurement Process

Procurement should start once approval for funding to the CIG which also includes approval of the project that the CIG intends to undertake.

As part of the management structure, each CIG is expected to have a Management Committee, a procurement Committee, a Finance Committee and a Monitoring and Evaluation Committee.

The minimum number for each committee is three (3) and each member of the Management Committee will be required to join any of the other three.

5.4.5.1 Setting up a Procurement Subcommittee

CIGs should establish a Procurement Subcommittee responsible for procurement in their group. The composition of the sub committee is one(1) management committee member, and two (2) ordinary members.

This committee will be responsible for:

- a. Preparing a procurement plan and updating it regularly;
- b. Preparing technical specifications and terms of references (often very simple) for goods, works and services respectively;
- c. Adhering to the procurement steps defined in this manual;
- d. Opening of bids
- e. Keeping procurement records in proper order.
- f. Taking on charge of goods and services procured
- g. Issuing of goods

5.4.5.2 Selecting a procurement method

This will be guided by the financial/budget for each particular requirement as shown in Table Table 5.2 below:

Table 5.2: Procurement Thresholds

Threshold/Ceiling: Use this method		Key activity
Up to Ksh10,000	Direct procurement or buy off the shelf directly from a seller. It should be within the Focal Development Area (FDA) jurisdiction where applicable	Shop around for the best price and keep a receipt
Between 10,001 to Kshs. 400,000	Shopping method; use of a Request for Quotation (RFQ) with receipt of at least three quotations. Give at least 7 days for submission of bids. It should be within the sub-county jurisdiction where applicable	Obtain a minimum of 3 quotations from approved suppliers by CIG

		Local bidding advertisement	
Between	Ksh.	with a wide reaching audience.	Obtain a minimum of 5
400,001 and	11311.	Give adequate time at least 14	quotations/bids from agreed suppliers
,		days for submission of bids It	by CIG.PCT's concurrence will be
2,000,000		should be within the county	required before award.
		jurisdiction where applicable	-

5.4.5.3 Preparing a Procurement Plan

Procurement planning is scheduling steps involved to procure goods and services. A procurement plan shows the items that will be required by a CIG and shows what will be procured and when and to meet which needs. To prepare a procurement plan each CIG will be required to engage its members in identifying their needs/requirements for their CIG for the next one year during the UTaNRMP AWPB planning cycle. The CIG takes into account these needs and prepares a plan showing what will be procured during the year/period for their CIG. It is important to note that any items not planned for will not be funded. The CIG proposals must have a procurement plan.

a) Packaging

When preparing the procurement plans, all related procurement items covered by the budget will be grouped and prepared into procurement packages. The procurement items will be grouped into goods, works, non-consulting services and consulting services. Procurement packaging has several advantages:

- i. It offers a better business chance to the sellers to supply in bulk;
- ii. Items procured in packages often result in lower unit cost therefore cost savings to CIGs;
- iii. It simplifies the procurement process. All similar items are procured in one go for a period. This reduces the hassle involved in buying similar things intermittently; and
- iv. It reduces overhead costs such as frequent advertising, bookkeeping and logistics to CIGs.

b) Procurement Plan preparation

Once packaging is done, the remaining individual items and packages should be recorded in the tables presented in Annex 4, FPF 11. This brings forward a consolidated list of resources required for the entire CIG. For convenience, all goods, services and works are grouped under the different tables. Once the tables are completed, a procurement plan is ready. Where capacity to store goods and suppliers exist, CIGs should buy in bulk.

5.4.5.4 Advertising

At the beginning, the Procurement Subcommittee should post a general advertisement to inform the community, as well as various suppliers and contractors about the business opportunities offered in the CIG. Advertisement is necessary to:

- i. Inform everyone about the business opportunities available;
- ii. Promote transparency and accountability;
- iii. Generate competition to get the best prices.

There are many ways for advertisement. Some of the commonly used include: (i) posting of a notice in the public places including shopping areas, churches/mosque, community hall/centre, government office, etc.; (ii) community discussion groups, chief's barazas; (iii) use of local radio station; (iv) distribution of flyers; (v) local newspapers, etc.

5.4.6 Procurement steps

This section explains the necessary procurement process steps.

5.4.6.1 Preparation of Technical Specifications

A specification is simply a definite description of what is needed or wanted for use by the user. Technical specifications referred to in tender documents will be prepared in liaison with relevant technical departments in order to ensure procurement of quality goods and services. Specifications shall be based on relevant characteristics and/or performance requirements while references to brand names, catalogue numbers, or similar classifications shall be avoided.

5.4.6.2 Procurement Requisition:

The management committee will initiate procurement by use of a written procurement requisition form and forward to the procurement sub- committee for action (appendix 4, FPF 10). The procurement sub- committee will prepare detailed description of their requirements such as the Bill of Quantities (BQs), Specifications, Terms of Reference (ToRs) among others.

5.4.6.3 Preparation of Tender Documents

As far as possible, CIGs are encouraged to make use of GOK standard tender documents for each type of procurement. Assistance of the relevant departments of the Government should be sought especially in the preparation of tender documents for civil works, and other technically sophisticated projects. A tender register must be kept (Appendix 3, FPF 20) for reference. In case of need for supply of samples by bidders; a register of samples must also be kept (Appendix 3, FPF 21)

5.4.6.4 Advertising of Tender Documents

The CIG must advertise the tenders in order to give equal opportunity to all interested suppliers/contractors/consultants in the area specifying the project/item description, required qualifications, closing and submission dates. **Under UTaNRMP funded procurements, tender documents should not be sold.**

5.4.6.5 Preparation, Submission and Opening of Tenders:

Tenders are to be received and opened in the manner stated in the tender documents and for the purpose of receiving tender bids, each CIG maintains a tender register. Tenders should be opened by a procurement committee and bidders' representatives who wish to attend should be allowed to attend and witness the process of opening.

5.4.6.6 Evaluation of Tenders:

Evaluation of bids is done by an adhoc Evaluation Committee consisting of at least three members one of which must be from the procurement sub-committee. The evaluation should be conducted in the manner indicated in the tender documents and may be done under technical and or financial. The evaluation committee should prepare an evaluation report indicating the bidder who is recommended for contract award to the Management committee for adjudication and award.

5.4.6.7 Contract Award:

The Management committee should make its decision on whom to award the contract on the basis of all the available information (technical and combined evaluation reports). Awards should be made to the lowest evaluated bidder for standard off-the-shelf items, and to the best evaluated bidder (both technical and financial) for specialized items and for consulting services. Awards by management committee shall be final and binding unless successfully appealed against by the other bidder(s). The award should be mailed to or collected by the successful bidder.

5.4.6.8 Signing of Contract:

3After the contract award by the management committee, the contract shall not be signed until after 7 days after the notification of contract award. The contract shall be deemed to be formed when it is signed by both parties. All Contracts will be signed by the CIG Chairperson, Secretary and Treasurer. A formal contract may not be necessary for contracts below Kshs. 50,000. Signed Local Procurement/Service Orders which are also signed by the supplier shall be sufficient in this case. Any contract above Ksh. 400,000 shall be sent to the PCT for concurrence.

5.4.6.9 Performance of Contract

After the contract is signed the supplier/ contractor/consultant shall be responsible for executing the contract in accordance with the tender document and client's proposal, terms and conditions of the contract and the relevant committee shall be responsible for the management of the contract. If it becomes necessary during the execution of the contract to amend the order given to the supplier, then an Order Amendment Form (Appendix 3 FPF 24) must be filled and duly signed by the relevant CIG Committee but execution of the amendment will only be done after receiving a written approval from PCT.

5.4.6.10 Receipt, Inspection and Acceptance

On the delivery of goods, works or services an ad hoc inspection and acceptance committee of not less than three members appointed by the management. The committee will get assistance from the relevant technical department to:-

- a) Immediately inspect and where necessary test the items involved
- b) Inspect and review the goods, works or services in order to ensure compliance with the terms and specifications of the contract
- c) Accept or reject on behalf of the CIG, the delivered goods, works or services.
- d) Ensure that the correct quantity has been received.
- e) Ensure that the goods, works or services meet the technical standards defined in the contract
- f) Ensure that the goods, works or services have been delivered or completed on time or that any delay has been noted and acted on
- g) Ensure that all required manuals or documentation have been received and
- h) Issue interim or completion certificates or goods recorded notes as appropriate and in accordance with the contract.
- i) Sign all the relevant documentation

The Inspection and Acceptance Committee must sign the Inspection and Acceptance Certificate (**Appendix 3, FPF 16**). Once works and services are completed by the contractor, a Completion Certificate must be signed (Appendix 3 FPF 25 and FPF 26).

5.4.7 Procurement Appeals Procedures

Those appealing against decisions have several avenues for redress. The Appellant should put his/her complaints in writing and should attach copies of the relevant documents.

- a. The complaint should be lodged with the CIG first;
- b. Government representatives for instance the County or Sub County Procurement Officer, the Chief and line ministry representative can also be approached and complaints lodged with them officially and in writing; and
- c. County Project Facilitating team members

If these initial and localized complaints fail to elicit action within seven (7) days upon submission, then the complainant/appellant has the right to take further actions through formal written complaints to various government agencies which include:-

- a. Project Coordinating Team;
- b. Public Procurement Oversight Authority (PPOA).
- c. Ethics and Anti-Corruption Commission (EACC); and

d. Kenya Police Service (CID)

Upon notification the PCT, will immediately start investigations and respond to the complainant within fourteen (14) days.

5.4.8 Procurement methods

Procurement methods are the rules about "how to buy?" resources. This section describes these rules and methods.

5.4.8.1 Direct procurement method

In the Direct Procurement method, the Procurement Subcommittee approaches a supplier/seller or service provider familiar to the community, to provide the goods or consultancy services. After negotiations, the item/service is procured (or a contract is signed, if needed) for the negotiated price.

This method is applied for all procurements that are **below** the financial threshold defined by the UTANRMP (see Table 5.2).

However, there may be instances when some good/service is required but its estimated financial value is **above** the threshold for direct procurement method. This situation may arise due to the following:

- a. The competitive methods cannot be used due to exceptional reason(s) like long distance which may bring about unnecessary delays, availability of goods/services, higher operating costs, sudden unforeseen needs etc;
- b. Only one consultant has the qualifications to carry out the assignment; or
- c. In cases of proprietary requirements, where only one supplier can provide the goods or equipment
- d. The assignment represents a natural or direct continuation of a previous contract awarded competitively, and the performance of the supplier or service provider has been satisfactory; or
- e. In cases of extreme urgency or emergencies.

The decision on the use of this method's is made on the basis of strong and convincing justifications, and where it offers clear advantages over the competition. It is recommended that these justifications are provided in the CIG proposal. CIGs need to balance the need for use of direct procurement against the risk of lack of transparency and risk of lack of providing opportunities to other prospective suppliers/service providers who could have provided a better service at a lower cost.

5.4.8.2 Quotations based method

This method involves solicitation and receipt of at least three quotations (or proforma invoices) from different suppliers/service providers. The steps involved in this method are presented below;

- a. Identify the item or the package of items to be procured from the procurement plan;
- b. Conduct the procurement process: This involves inviting quotations from at least three bidders approved by the CIG, giving them enough time to submit their quotations in a sealed envelope, evaluating the bids offered and costs, selecting a successful bidder and award.

The **advantages** of this method include getting value for money through competition, transparency and ease in accountability/audit and business opportunity for the suppliers/service providers

5.4.8.3 Local bidding method

For purpose of this manual Local bidding refers to procurement within the region. This method is more elaborate than the quotations based procurement method. It is applicable to higher value procurements and requires more experience. This method requires advertisement for the goods and services needed. Advertisement is done in order to give equal opportunity to all interested suppliers; inform everyone about the business opportunities available; promote transparency and accountability; and to generate competition to get the best prices.

The advertisement must specify the project/item description, required qualifications, closing and submission dates. This may be done by(i) posting of a notice in public places including shopping areas, churches/mosque, community hall/centre, government office, etc.; (ii) community discussion groups, chief's barazas; (iii) use of local radio station; (iv) distribution of flyers; (v) local news papers, etc

All prospective bidders will be required to quote their prices and submit their bids in sealed envelopes. Opening of the bids is done in the presence of bidders who wish to attend, after which the CIG compares the services offered and costs, selects a successful bidder and awards.

5.4.9 Procurement record keeping and monitoring

CIG must keep procurement documents in proper order. They include:

- i. The procurement plan;
- ii. Proof of advertisement;
- iii. Copies of contracts signed;
- iv. All receipts;
- v. Payment record (voucher);
- vi. Record of items in storage.

- vii. Requisition forms by the procurement sub-committee approved by the executive committee
- viii. Returned quotations by bidders
- ix. Evaluation reports
- x. Inspection and acceptance reports
- xi. Adjudication and award reports.

A representative of the UTaNRMP, from time to time, will check records to ensure that the procedures described in this manual are followed and records are kept in proper order as part of the normal UTaNRMP process of ensuring that project funds are used appropriately.

The representatives may also ask the Procurement Subcommittee to show where a procured good or service has been used. Before a payment is made to a supplier or service provider, the Procurement Subcommittee should inspect and certify that the goods/services are in acceptable condition. When the CIG lacks the expertise to make an inspection, it may contact the nearest UTANRMP office for assistance and help.

5.4.10 Store Keeping

Items procured or supplied for a project and relevant documents are the responsibility of the CIG procurement sub- committee:

- i. The procurement sub-committee should undertake appropriate measures in storing items, such as, allocating a secure room or storage area under lock and key;
- ii. If needed, a watchman should safeguard the stored supplies;
- iii. The CIG should designate a person (storekeeper) who is responsible for the storage;
- iv. The storekeeper should keep a store record book (Appendix 3 FPF 19).

5.4.11 Use of project Equipments

All Equipments procured through projects funds must be used optimally to achieve the objective of the CIG but in case of underperforming, the project can repossess it and give it to another deserving group after ascertaining non-performance.

5.1.2 Conflict of Interest

In order to avoid conflict of interest, CIG members and their immediate relatives will not be allowed to participate in the supply of goods and services, unless this is done on a competitive basis. Even so, such CIG members will be expected to declare any such conflict and will be expected to disqualify themselves from participating in any of the procurement steps for which such declaration has been made.

5.5 Inspection of books of accounts and all records

The CIGs must keep all records for a period of ten (10) years and make them available for inspection by PCT Secretariat, IFAD, or the appointed agents of the above- Internal and external auditors. The CIGs are required to maintain the following: - an inventory of tagged fixed assets procured through the project, all approved proposals, all signed contracts, all minutes of the meetings. The CIG physical assets financed by UTaNRMP shall bear the name of UTaNRMP (GOK/IFAD) and identify the project as financed by UTaNRMP (GOK/IFAD).

5.6 Fund Misuse

It is important to recognize that when funds are misused,pre-determined steps/actions will be followed. The following steps should be taken:

- a) There should be written chronology of events by relevant institution (e.g. FDAC, , CIG etc)describing the facts of the case, proposed way forward with copies to relevant parties including PCT, other GoK staff handling project issues and GoK security agents
- b) The communication should also be publicly displayed at the nearest public notice board (Chiefs) in the area of the CIG which includes action to be taken or taken and should not exceed 10 days
- c) In the absence of appropriate action the PCT will call a meeting immediately after 10 days with the relevant parties;
- d) The meeting will define a list of actions to be taken within the period of one month. The CIG project will be formally placed in the category of "project under investigation"; No further applications shall be endorsed by the PCT from the FDA until the case is solved. This will be formally communicated to the respective parties; The PCT can start legal proceedings to freeze all the accounts of the CIG and the officials;
- e) The PCT will either engage in a legal process to recoup the lost funds or require the respective CIG to return lost funds;

5.6.1 Penalty in the case of Fund Misuse

In case of misuse of funds above, the sanctions and remedies provided for in 4.11.6 will apply.

5.6.2 Complaints Mechanism (general)

The PCT will establish:

- 1) A complaints register and dedicated telephone line
- 2) A complaints / suggestions box. And
- 3) Telephone call which should recorded but follow-up with written complaint

Complaints being submitted to the PCT will be registered and introduced as an item on the agenda at the PCT monthly Meeting. The complaints box will be opened prior to the PCT meetings.

APPENDIX 1: FORMATS AND SAMPLE CONTRACTS

F1: Call for Proposal Media Release

Upper Tana Natural Resources Management Project

Introduction

Upper Tana Natural Resources Management Project is an eight year project (2012-2020) funded by Government of Kenya, International Fund for Agricultural Development (IFAD), Spanish Trust Fund and the Local community. The **goal** of the project is to "contribute to reduction of rural poverty in the Upper Tana river catchment". This goal is pursued via two **development objectives** which reflect the poverty-environment nexus namely (i) increased sustainable food production and incomes for poor rural households living in the project area; and (ii) sustainable management of natural resources for provision of environmental services.

The project area is in the Upper Tana catchment which covers an area of 17,420 km² and includes 24 river basins and the tributaries of the five rivers formerly under MKEPP that drain into the Tana River as follows

Tributaries of former	Ena (Itimbogo, Thuura and Gangara)
Mt Kenya Pilot	Kapingazi/Rupingazi (Kiye, Thambana, Itabua and Kathita),
Project for NRM	Kathita (Gaciuma/Kinyaritha, Kuuru, Riiji),
(MKEPP) River	Kithinu/Mutonga (Naka, Nithi, South Maara, North Maara and Thuci)
Basins (4)	
Twelve (12)High	Maragua, Murubara, Nairobi, Ragati, Rujiweru, Rupingazi, SabaSaba,
Priority River Basins	Thangatha, Thanantu, Thiba, Thika/Sasumua, Thingithu
for UTaNRMP	
Twelve (12) Other	Amboni/ Muringato, Iraru, Kayahwe, Chania, Mara, Mariara, Mathioya,
River Basins for	Nyamindi, Ruguti, Rwamuthambi, Sagana, Ura
UTaNRMP	

The area covers six of Kenya's 47 counties namely; Embu, Tharaka Nithi, Meru, Nyeri, Kirinyaga and Murang'a. The area includes the Mt. Kenya and Aberdares National Parks and surrounding Forest Reserves.

The project aims at poverty reduction targeting about 205,000 households (1,025,000 people) whose livelihoods revolve around the use of the natural resources of Upper Tana catchment. These include smallholder crop and livestock farmers, agro-pastoralists, fishers, rural traders, and community groups involved in natural resources management (NRM) and income generating activities. The project will also provide indirect benefits to the non-target groups in the Upper Tana catchment through services and enterprises linked with the project activities, as well as to populations outside the catchment who rely on water and hydro-electricity from the river system.

The Implementation is through four components namely: Sustainable Water Resources and Natural Resources management, Sustainable Rural Livelihoods, Community Empowerment and Project Coordination and Management.

Call for Proposals / Media Release

The project will provide matching grants to Common Interest Groups (CIGs) through Project Coordinating Team (PCT) to help them implement Income Generating Activities (IGAs) upon **submission of acceptable proposals** using a Community Driven Development (CDD) approach. The grants will be output-based with release of funds being made in tranches upon the achievement of milestones specified in the grant agreement between the PCT and the CIGs. The CIGs will receive an initial advance of the grant amount, and will subsequently lodge claims for further payments as each milestone is reached, and a simple milestone report is submitted. The PCT will engage the services of an Independent Oversight Agents (a private service provider) to verify the milestone reports before further financial releases are made. This milestone-based payment system is intended to strengthen accountability and transparency, as well as reduce the administrative burden associated with using accountable cash advances whereby each advance has to be acquitted surrendered before the next payment is made. The project activities funded under this window should be income generating, friendly to the environment and the natural resource base. They may include the following sectors among others:

- Agriculture/horticulture and related enterprises;
- Fisheries and related enterprises
- Small/micro-Irrigation projects
- Livestock production and related enterprises;
- Forestry and tree nursery development;
- Value addition ,Food processing and marketing
- Energy saving technologies including renewal energy.

Matching Grants

Matching grants will be provided up to a ceiling amount of **Kshs 2** (**Two**) Million in category A **B and C**. The CIG will be required to contribute 10%-30% while UTaNRMP will provide matching grants of up to a maximum 70%-90% of the Project proposal, except in Category B where the maximum is 90%. Special consideration will also go to **group of vulnerable persons and youth** which is funded up-to to a maximum of 90- 100%. Grants are to be provided for a range of activities to support livelihoods activities. In special circumstances, the project can fund such groups up to 100% on case by case basis

Eligibility

As a minimum, the CIG must be a registered as a community self-help group by a relevant government institution.

- Be an active group and have field activities and have been in operation for the last six months
- Have a bank account with a reputable financial institution
- Provide evidence of 1/3 (30% minimum) of the costs of the project as evidenced by such an amount in their bank account or a combination of labour/materials and cash.

Duration

The projects are to be completed within a **12 month** time frame. However exception will be on projects in Category B and C.

Deadline

The call for proposal deadline is Day/month/yyyy(14 days from the date of the Call for Proposals).

F3.4: Milestone Based Payment System.

The project will fund the activities of the micro-project through a milestone based system where the micro-project activities will be classified into sequential clusters . Each milestone will be paid after the independent oversight agent certifies that the agreed activities have been undertaken and forward the same to PCT for payment with the necessary supporting documents .

The following is the format for payment of subsequent milestone

Name Of The CIG Group				
Project Name				
Total Cost Of The Project				
Milestone one (1)	Activities for each milestone one (1)	Cost per activity	Total due	Achievement

Milestone two(2)	Activities for each milestone two(2)	Cost per activity	Total due	Achievement
Milestone Three (3)	Activities for each milestone one (1)	Cost per activity	Total due	Achievement
Milestone Four (4)	Activities for each milestone one (1)	Cost per activity	Total due	Achievement

Independent oversight agent

	belonging to		Comm	on Intono	at Chaum	Thosa

Payment Terms:

- i. Unless otherwise indicated below, the payment will be made as per agreed milestones upon verification by the Independent Oversight Agent. Funds for the first milestone will be deposited at project implementation initiation.
- ii. Notwithstanding the above, the amount and intended dates of payment as relates to the project milestones are provided as follows:

Date	Milestone No	Milestone Description	Amount (Kshs)

5.0: Conditionalities

- i. The Laws of Kenya requires that for the CIG to be recognised, it must be registered with relevant department with a current certificate. The CIG must therefore be registered and have a current certificate from the department responsible for Social Services/cooperatives
- ii. The CIG must have a Constitution with clear roles and responsibilities.
- iii. The CIG management must be democratically elected and registered as per their Constitutions.
- iv. No Funds will be withdrawn from the designated account without CIG minutes authorizing the same and endorsed by the local officer responsible for Social Services

6.0 Obligations of the Parties

6.1 UTaNRMP

- i. The Upper Tana Natural Resources Management Project will avail the funds as per the milestones upon advice by the Independent Oversight Agent
- ii. UTaNRMP will administer this contract as per agreed milestones

6.2 The CIG

- i. The CIG will open a designated Bank Account specifically for UTaNRMP funds in a reputable financial institution acceptable to UTaNRMP Project Coordination Team
- ii. The CIG management/members will attend all required trainings modules before the grants are released to them
- iii. The CIG will adhere to the agreed milestones as per the project proposal. A detailed implementation plan with clear milestones must be agreed with UTaNRMP-PCT

- iv. The CIG will facilitate the activities of Independent Oversight Agent during the milestones verification missions.
- v. The CIG will be responsible to request the County Project Coordinator to initiate the Project Completion Certificate process
- vi. The CIG Signatories to this contract binds themselves individually and collectively to refund the funds in case of any misappropriation.

7.0 Conflict Resolution

Chairperson

- i. The Parties will act in good faith at all times during the life of this agreement
- ii. In case of misunderstanding, the parties will endeavour to sort issues through dialogue and arbitration when and if necessary
- iii. The relevant Laws of Kenya will apply during the execution of this contract.

8.0 Validity of this Contract/Agreement

This agreement takes effect upon signing and ends once a project completion certificate is issued to the Common Interest Group

I certify that I am personally responsible for the funds received in case of misuse by the CIG

CONDITIONS OF ENGAGEMENT		
1.00: GENERAL CONDITIONS		
1.01: Definitions 1.02: Scope Of Service	Unless the context otherwise requires, the following terms whenever used in this Contract have the following meanings: • a) "Client" Means "UPPER TANA NATURAL RESOURCE MANAGEMENT PROJECT" by who the consulting firm is employed for the purpose of fulfilling the Agreement; • The project Coordinator, who is also the Chief Executive Officer appointed by the "Client" to deal between the consulting firm and the client on all matter arising out of this agreement; • "Consulting firm" means the firm appointed as set forth under the Contract of agreement to this Agreement; • "Services" means the services set out in the TOR referred to this Agreement as being the subject of implementation; • "Applicable Law" means the Laws of Kenya and any other instruments as may be issued from time to time; • "Party" means the Client or the Consultants, as the case may be and "Parties" means both of them; • "Contract" means the Contract signed by the Parties; • "Contract Price" means the price to be paid for the provision of the Services; • "Government" means the National Government of Kenya; • "local currency" means the currency of the Government of Kenya; • "Personnel" means persons hired by the Consultant as employees and assigned to the provision of the Services or any part thereof; The scope of service shall be to carry out as detailed in the Terms of Reference (TOR)	
1.03: Location	The Services shall be performed in the UPPER TANA NATURAL RESOURCE MANAGEMENT PROJECT area.	
1.04: Authorized Representatives	Any action required or permitted to be taken, and any document required or permitted to be executed, under this Contract by the Client or the Consultants may be taken or executed by the official's representative. Official representative of the client or the consultant.	
1.05: Effectiveness	This Contract shall come into force on the date the Contract is signed by both parties.	

of Contract		
1.06: Commencement of Contract	The Consultant shall begin carrying out the Services with effect from the date of signing the contract	
1.07: Expiration of Contract	Unless terminated earlier, this Contract shall terminate on or before expiry of	
1.08: Modification	Modification of the terms and conditions of this Contract, including any modification of the scope of the Services time, or of the Contract Price, may only be made by written agreement between the Parties.	
1.09: Care and Diligence	The consulting firm shall exercise all reasonable skill, care and diligence in the discharge of the duties agreed to be performed by the client, and shall not authorise any modification of the Services rendered which results in the services cost exceeding the approved contract sum	
1.10: Amendments Procedures	Any changes, modifications or amendments to this Agreement except as specifically provided for herein, shall be made only by mutual agreement in writing between the parties hereto. This may be done in form of an addendum which shall be integrated as part of the Agreement. Amendment of the contract price in this agreement leading to increase or decrease of cost shall be made only by mutual agreement in writing between the parties hereto.	
1.11: Governing Language	Any notice request required or permitted to be given or made under this contract shall be in writing in the English language. Such notice or request shall have been delivered by hand, mail or cable to the party, which is required to be given;	
1.12: Changes of Law.	If, in the country there should occur, subsequent to the date of this Agreement, changes to any National or state Statute, Ordinance, Decree, Law Regulation or By-law which causes additional or decreased cost to the consulting firm in the performance of his services, such additional or reduced cost shall be met by the client.	
2.04: Default	 i. Any unnecessary delay occurs in carrying out the duties and services to be performed, or any part thereof through the default of the consulting firm; or ii. The consulting firm fails to carry out the said duties and services to the satisfaction of the client; or iii. The consulting firm shall fail to comply with any instructions given; The client may serve notice upon the consulting firm in respect of any of the 	

foregoing defaults requiring them to take remedial action by a specified date.

- b) If the consulting firm:-
- *i*. Shall fail to comply with any requirement of such notice to the entire satisfaction of the client; or
- *ii.* Shall comply with the requirements of such notice to the satisfaction of the clients but shall again become liable to be served with a notice under paragraph a) of this clause
- iii. Shall assign or sub-let the contract or any part thereof without permission in writing from the client or
- *iv.* Shall become bankrupt or insolvent or shall compound with or make any assignment for the benefit of their creditors;

Then the client may at once by notice by registered post determine the employment of the consulting firm under this contract and the client may then complete the duties and services to be performed by employment of other consulting firms. In the case the client shall exercise the option mentioned in this clause, they shall not be bound to pay the consulting firm any money on account of this Agreement until the work, duties and services to be performed have been prepared, at which time the consulting firm—shall be entitled to receive such sums as are then due after deducting sums expended by the client in completing and upholding the duties and services to be performed and all—other expenses which they have incurred.

2.05:Termination/

Suspension by Notice of the Client

The client may by written notice to the consulting firm at any given prior notice of his intention to suspend or abandon the services in whole or in part, to terminate this Agreement. The effective date of suspension or abandonment of Agreement shall not be less than seven (7) days after effective receipt of such notice or as may be agreed between the parties. Upon receipt of such notice, the consulting firm shall take immediate steps to bring the services to a close and reduce expenditures to a minimum. The Client may also with a written notice suspend the services in this Agreement in whole or part if conditions have arisen which, the reasonable opinion of the client, interfere or threaten to interfere with the ability to successfully carry out the consultancy or the accomplishment of the purposes of the Agreement.

The effective date of suspension and action to be taken by the consulting firm upon receipt of the notice shall be the same as for issuance of notice for suspension or abandonment of termination described in the preceding paragraph.

Upon suspension or abandonment of this Agreement, in whole or in part, to its termination and subject to the obligation of the consulting firm to reduce expenditure to a minimum as stated in the preceding paragraph, the consulting firm shall be entitled to receive the remuneration due up to the effective date of suspension or abandonment or termination and reimbursement in full for such out-

2.06: Ownership of Document and Copyright.	of-pocket expenses as specified that shall have been properly incurred prior to the effective date of such suspension or abandonment or termination and for all costs incidental to the orderly termination of the whole or affected services, and in the case of suspension, for all costs incidental to the orderly termination and resumption of the services. The return travel of the consulting firm's personnel, their dependents and effects shall be included in the incidental costs. All documents prepared by the consultant in connection with the services are the property and copyright of the client, and the consulting firm shall not be entitled, either directly or indirectly to make use of such documents for the carrying out of any work beyond the services to which this Agreement relates, without prior approval of the client.
2.07: Arbitration on this Agreement	Any dispute or difference arising out of this Agreement which cannot be settled amicably shall be referred to the arbitration of a person to be agreed upon between the consulting firm and the client.
2.08: Jurisdiction	This Agreement shall be governed by and construes in all respects in accordance with the Laws of Kenya
3.00: OBLIGATIONS C	OF CONSULTING FIRM
3.01: General	The Consultant shall perform the Services and carry out their obligations with all due diligence, efficiency, and economy, in accordance with generally accepted professional techniques and practices, and shall observe sound management practices, and employ appropriate advance technology and safe methods. The Consultant shall always act, in respect of any matter relating to this Contract or to the Services, as faithful advisers to the Client, and shall at all times support and safeguard the Client's legitimate interests in any dealings in relation to this contract.
3.02: Core Staff	The consulting firm will be responsible for the provisions of properly qualified staff as itemized in the consulting firm proposal
3.03: Duties of Consulting Firm	The consulting firm shall undertake such duties and responsibilities such as are described in the TOR which forms part of this contract.
4.00: SETTLEMENT O	F DISPUTES
4.01: Amicable	The Parties shall use their best efforts to settle amicably all disputes arising out of

Settlement	or in connection with this Contract or its interpretation	
5.00: FORCE MAJEU	RE	
5.01: Definition	For the purposes of this Contract, "Force Majeure" means an event which is beyond the reasonable control of a Party and which makes a Party's performance of its obligations under the Contract impossible or so impractical as to be considered impossible under the circumstances.	
5.02: No Breach of Contract	The failure of a Party to fulfil any of its obligations under the contract shall not be considered to be a breach of, or default under, this Contract insofar as such inability arises from an event of force Majeure, provided that the Party affected by such an event (a) has taken all reasonable precautions, due care and reasonable alternative measure in order to carry out the terms and conditions of this Contract, and (b) has informed the other Party as soon as possible about the occurrence of such an event.	
5.03: Extension of time	Any period within which a Party shall, pursuant to this Contract complete any action or task, shall be extended for a period equal to the time during which such Party was unable to perform such action as a result of Force Majeure.	
5.04: Payment	During the period of their inability to perform the Services as a result of an event of Force Majeure, the Consultant shall be entitled to continue to be paid under the terms of this Contract, as well as to be reimbursed for additional costs reasonably and necessarily incurred by them during such period for the purposes of the Services and in reactivating the Service after the end of such period as agreed between the parties.	
6.00: PAYMENT		
6.01: Lump Sum Remuneration	The Consultant's total remuneration shall not exceed the Contract Price and shall be a fixed lump sum including all staff costs, printing, communications, travel, accommodation, and the like, and all other costs incurred by the Consultant in carrying out the Services described in the TOR.	
6.02: Interest on Delayed Payments	If the Client has unnecessarily delayed payments beyond ninety (90) days, interest may be paid to the Consultant for each day of delay at the rate one (1) point above the inter-bank lending rates as published by the Central Bank of Kenya.	
6.03: Contract price	The UTaNRMP will pay the consulting firm a sum of Kshs for the services rendered under this Agreement on quarterly basis after the client certifies that all the services have been rendered as the proposal documents and this contract.	

6.04: Taxes and	Unless otherwise specified, the Consultant and their Personnel shall pay such taxes,	
Duties duties, fees, and other impositions as may be levied under the Applicable La amount of which is deemed to have been included in the Contract Price.		
6.05 Terms and conditions of payments (a) The contract price will be paid to the consulting firm by the satisfactory completion and submission of acceptable report as per (b) All payments will be made to the consulting firm within 90 days af Submission of their accounts to the Project Coordinating Team in accounts and having fulfilled clause (a) above		
	If the payment is not unnecessary made within 90 days specified in 6.05 (b) interest equivalent to one (1) point above the inter-bank lending rates as published by the Central Bank of Kenya may be charged on the unpaid due balance as of the due date. No other contingencies will be considered during this assignment except those arising in circumstances already agreed upon, or as a result of definite change in costs or extension of the said contract by the client.	
6.0.5 : Declaration on Corrupt and Fraudulent Practices	The parties hereby declare that none shall be involved in corrupt and fraudulent practices during the execution of this contract.	

F 4.3: CIGs and Contractors/ Service Providers

a) Sample Contract for Works

Clause 2 - Subcontracting

The contractor may subcontract one or several parts of his works only under his entire responsibility.

Clause 3 - Control of the Work Execution

The execution of this contract is controlled by the Committee of the [name of CIG]. The Government, that provides a major part of financing for the Micro project, may send its own technicians to inspect the work being done or completed. In case of non-conformity to the norms or rules of the profession, the Representative of the CIG, upon a report of the person in charge of the Government's technicians, may bring to the attention of the contractor the breach of contract. An assessment will be made by the Government technicians. The works poorly executed shall be repaired or improved by the contractor.

Clause 4 - Responsibility

The contractor is responsible during the execution of the work for the damages and accidents of any kind caused to a third party by the personnel and equipment of the contractor.

Clause 5 - Time Limit for the Work Execution

The whole work should be completed withinmonths from the date of the signature of the contract.

Clause 6 - Liquidated Damages

In the event that works specified in the contract are not completed on schedule, the contractor shall be subject to a penalty of 1/1000 of the price of the works ordered per calendar day of delay, except in the case of force majeure, that would need to be confirmed by a Government's technician appointed by the authorities of the [name of CIG].

Clause 7 - Interim Receipt

The interim receipt will be acknowledged in a report and issued upon completion of the works. A certificate of acceptance will be provided by the Committee of [name of CIG], which may first request an opinion from a Government-appointed technician.

Clause 8 - Final Receipt

The final receipt will be acknowledged in a report of the Committee of [name of CIG], who may seek the prior opinion of a Government technician appointed by the authorities responsible for the implementation of the UTaNRMP.

Clause 9 - Amount of the Contract

The amount of the contract is Kshs.....

Clause 10 - Schedule of Payments

The schedules of payments are:

[An example]

Item	Implementation Stage	Description	Amount
1.	Advance for start up		10%
2.	First Stage	E.g. site clearing and Foundation	30%
3.	Second stage	Walling and roofing	30%
4.	Third stage	Painting and fittings	25%
5.	Fourth stage	Retention	5%

Clause 11

This agreement is signed as follows:
Done at[place and date]
(a) Names of CIG Representatives:
Signature: Date
(b) Name and position of Representative of the Contractor:
Signature Date
b) Sample Order and Contract for Services
Name and Address of CIG
To: [Name of the Director and firm which has won the contract]
Address:
Subject : Supply of [Specify such as studies, technical assistance, consulting, and supervision services] Services
The [Name of CIG] would like to place an order for the supply [specify services such as studie technical assistance, consulting, supervision etc] services, in conformity with your bid offer No Of, attached, specifying the assignment and prices of the services for whose procurement you successfully competed
1. Content and Progress of the Assignment
The study and its progress will be in accordance with the terms of reference attached to th document.
2. Amount of the Contract
The amount of the contract [or rate per day and number of days] is fixed at [Kescurrenc units] and is not subject to revision during the contract period.
3. Time Limit and Submission of Report

months) from the date of the approval of this invoice letter by the consultant or consulting firm. This approval should take place in the maximum time limit of 15 days from the date of signing of this order/contract. Your firm will submit an edited interim report (5 copies) to the [name of CIG] at the end of the field work. Five (5) copies of the final edited report will be submitted to the [name of CIG] two weeks after its review of the interim report. At the same time, one copy will be submitted to It is agreed that the [name of CIG] will be allowed 30 days for the review of the interim report. After that time limit, the interim report may be considered as final if no comments for amendments or otherwise are received from the CIG. 4. Liquidated Damages In case of delay beyond the period specified in the contract, you [your firm] are subject to a penalty of 1/1000 of the price of the studies per calendar day of delay. However, the ceiling of these penalties is 10% of the total amount of the contract. In case the 10% ceiling is exceeded, the [name of CIG] reserves the right to terminate this order/contract. 5. Schedule of Payment The amounts which are due will be paid in the following manner: _____% at the countersigning of this letter of order, for advance payment [the amount of this advance should in no circumstance exceed 30% of the total amount]. _____% of the amount of the invoice upon issuance of the interim receipt. ____% of the amount of the invoice upon issuance of the final receipt. 6. Review and Approval of the Contract This document will become effective only after it has been signed by both parties and

F4.4 Sample Contract for Consultancy Services

(This Annex provides a standard sample Service Contract document as an example. In general terms, CIG can sign such a contract with Contractor/Supplier based on a lump-sum cost estimate for the delivery of well-defined outputs and outcomes).

CONTRACT FOR CONSULTING SERVICES

SMALL ASSIGNMENTS LUMP-SUM PAYMENTS

CONTRACT

THIS CONTRACT ("Contract") is entered into this [insert starting date of assignment], by and between Name of CIG("the Client") having its principal place of business at [insert Client's address], and [insert Name of Consultant] ("the Consultant") having its principal office located at [insert consultant's address].

WHEREAS, the Client wishes to have the Consultant perform the services hereinafter referred to, and

WHEREAS, the Consultant is willing to perform these services,

NOW THEREFORE THE PARTIES hereby agree as follows:

1. Services

- (i) The Consultant shall perform the services specified in <u>Annex A</u>, "Terms of Reference and Scope of Services," which is made an integral part of this Contract ("the Services").
- (ii) The Consultant shall provide the personnel listed in <u>Annex B</u>, "Consultant's Personnel," to perform the Services.
- (iii) The Consultant shall submit to the Client the reports in the form and within the time periods specified in Annex C, "Consultant's Reporting Obligations."

2. Term

The Consultant shall perform the Services during the period commencing [insert starting date] and continuing through [insert completion date], or any other period as may be subsequently agreed by the parties in writing.

3. Payment

A. Ceiling

For Services rendered pursuant to Annex A, the Client shall pay the Consultant an amount not to exceed [insert amount]. This amount has been established based on the understanding that it includes all of the Consultant's costs and profits as well as any tax obligation that may be imposed on the Consultant.

B. Schedule of Payments

The schedule of payments is specified below:¹

[insert amount and currency] upon the Client's receipt of inception report and a copy of this Contract signed by the Consultant; [insert amount and currency] upon the Client's receipt of the draft report, acceptable to the Client; and

[insert amount and currency] upon the Client's receipt of the final report, acceptable to the Client. [insert amount and currency] Total

C. Payment Conditions

Payment shall be made in [specify currency], no later than 30 days following submission by the Consultant of invoices in duplicate to the Coordinator designated in paragraph 4.

4. Project Administration

A. Coordinator.

The Client designates Mr. /Ms. [insert name] as Client's Coordinator; the Coordinator will be responsible for the coordination of activities under this Contract, for acceptance and approval of the reports and of other deliverables by the Client and for receiving and approving invoices for the payment.

B. Reports.

The reports listed in Annex C, "Consultant's Reporting Obligations," shall be submitted in the course of the assignment, and will constitute the basis for the payments to be made under paragraph 3.

5. Performance Standards

The Consultant undertakes to perform the Services with the highest standards of professional and ethical competence and integrity. The Consultant shall promptly replace any employees assigned under this Contract that the Client considers unsatisfactory.

6. Confidentiality

The Consultants shall not, during the term of this Contract and within two years after its expiration, disclose any proprietary or confidential information relating to the Services, this Contract or the Client's business or operations without the prior written consent of the Client.

7. Ownership of Material

Any studies reports or other material, graphic, software or otherwise, prepared by the Consultant for the Client under the Contract shall belong to and remain the property of the Client. The Consultant may retain a copy of such documents and software.²

8. Consultant not to be engaged in Certain Activities

The Consultant agrees that, during the term of this Contract and after its termination, the Consultant and any entity affiliated with the Consultant, shall be disqualified from providing goods, works or services (other than the Services and any continuation thereof) for any project resulting from or closely related to the Services.

9. Insurance

The Consultant will be responsible for taking out any appropriate insurance coverage.

10. Assignment

The Consultant shall not assign this Contract or sub-contract any portion of it without the Client's prior written consent.

11. Law Governing Contract and Language

The Contract shall be governed by the laws of [insert government], and the language of the Contract shall be [insert language].

12. Dispute Resolution⁴

Any dispute arising out of the Contract, which cannot be amicably settled between the parties, shall be referred to adjudication/arbitration in accordance with the laws of the Client's country.

For the Client for the Consultant Signed by _____ Title: ____ Title: ____

List of Annexes

Annex A: Terms of Reference and Scope of Services [describe what has to be delivered – micro project proposal]

Annex B: Consultant's Personnel [list who will be involved in implementing the micro project]

Annex C: Consultant's Reporting Obligations [define what reports MICRO PROJECT will submit]

Footnotes:

- 1. Modify, in order to reflect the output required, as described in Annex C.
- 2. Restrictions about the future use of these documents and software, if any, shall be specified at the end of paragraph 7.
- 3. The law selected by the Client is usually the law of its country. However, the Bank does not object if the Client and the Consultant agree on another law. The language shall be English, French, or Spanish, unless the Contract is entered into with a domestic firm, in which case it can be the local language.
- 4. In the case of a Contract entered into with a foreign Consultant, the following provision may be substituted for paragraph 12: "Any dispute, controversy or claim arising out of or relating to this Contract or the breach, termination or invalidity thereof, shall be settled by arbitration in accordance with the UNCITRAL Arbitration Rules as at present in force."

F 5.8 Case Study Template

The template below will be used to capture the format for the annual case studies.

_	Chapter Cuide
Chapter Title	Chapter Guide
Introduction and Justification	☐ Brief description and any relevant background information which
	would assist in the understanding of the case study.
	☐ Purpose and expected use of the case study
	Detailed background information (e.g. project action plan/ logical
	framework) to be included in an annex
The issue (s) being addressed	☐ The problem being addressed by the intervention
	 Identify the problem
	O How was the problem identified?
	• Was the process for identifying the problem effective?
	☐ List the issues resolved and/or outstanding which need to be
	addressed related to this case study.
	☐ For the outstanding issues whom should take action to resolve them
	and why.
Methodology	☐ How was the process carried out? (Describe the process of selecting
	the case and data collection sources, as well as how data was
	collected.)
	☐ What assumptions are there (if any)?
	☐ Any limitations?
	☐ What instruments were used to collect data? (To be included in the
	appendix.)
	☐ What sample(s) is/are being used?
	Over which period of time was data collected?
Steps Taken to Address the	☐ A description of how the project sought to address the challenge
Problem	What was done (activities/interventions/inputs), where, by
	whom, for whom?
The Results	☐ What were the results of intervention, particularly the significant
	or unique results?
The Challenges and How They	This focuses on challenges/ difficulties encountered and what was done to
were Met	overcome them.
Beyond Results	Are the results mentioned above sustainable? Why or why not?
Lessons Learned	Briefly describe what you would do differently and what lessons you
	would share with others undertaking a similar project.
Conclusion	List any relevant acknowledgements and references
Appendices	and admit interpretation and references
Tippolidicos	I .

F 6: Sample Memorandum of Understandings (MOUs)

${\bf F~6.1~Memorandum~of~Understandings~Between Focal~Development~Area~Committee} \ ({\bf FDAC})~and~Common~Interest~Group$

(Hereinafter referred to as "The MOU")

REPUBLIC OF KENYA

UPPER TANA NATURAL RESOURCES MANAGEMENT PROJECT (UTaNRMP)

MINISTRY OF WATER AND IRRIGATION

MEMORANDUM OF UNDERSTANDING

BETWEEN
FOCAL DEVELOPMENT AREA COMMITTEE
and
COMMON INTEREST GROUP

MEMORANDUM OF UNDERSTANDING BETWEEN

FDAC) and CIG

(Hereinafter referred to as "The MOU")

Date:
Parties:
This MOU is made between:
The Common Interest Group (Name) Within FDA in. River Basin in Sub-County of. County
and
The Focal Development Area Committee of
Hereinafter referred to as "The Parties"
FOR COOPERATION IN RELATION TO THE IMPLEMENTATION AND MONITORING OF COMMON INTEREST GROUPS ACTIVITIES FUNDED UNDER THE UPPER TANA NATURAL RESOURCE MANAGEMENT PROJECT (UTanrmp) MATCHING GRANTS WITHIN THE FOCAL DEVELOPMENT AREA
Within
1.0 Preamble
1.1 The Focal Development Area Committee-FDAC
i. The FDAC is a community representatives committee elected to oversee the planning, implementation, monitoring and Evaluation of UTaNRMP activities within a Focal Development Area.

iii. The activities within an FDA are contained within the Community Action Plan (CAP) developed through the Participatory Rural Appraisal (PRA) Process. The PRA is aimed at flagging out community felt needs.

ii.

800-1200 Households

The FDA's are sub-sets of WRUA's or CFA whichever is applicable with a population of

iv. The CAP's from various FDA's are used to develop respective Annual Work plans and Budget (AWPB) for respective Counties and ultimately for UTaNRMP and the Lead Agency/Ministry

v. The FDAC is elected for a period of 3 years and registered under department Social Development.

1.2 The Common Interest Group-CIG

- i. A Common Interest Group (CIG) is a community based organization working together for a common purpose.
- ii. A common interest group is normally formed to answer to a common problem or need within the members of the group
- iii. A CIG aims at pooling resources individually and collectively to accomplish their common purpose
- iv. A CIG is essentially a Self Help Group
- v. A CIG Must be registered with the Department of Social Development .However in strict legal terms, CIG's are not legal entities

1.3 Upper Tana Natural Resources Management Project

- i. The Upper Tana Natural Resources Management Project is an eight year project (2012-2020) funded by Government of Kenya, International Fund for Agricultural Development (IFAD), Spanish Trust Fund and the Local community.
- ii. The **goal** of the project is to "contribute to reduction of rural poverty in the Upper Tana river catchment". This goal is pursued via two **development objectives** which reflect the poverty-environment nexus namely (i) increased sustainable food production and incomes for poor rural households living in the project area; and (ii) sustainable management of natural resources for provision of environmental services.
- iii. The project covers an area of 17,420 km² and targets a population of 205,000 households (1,025,000 people) in six counties of Embu, Tharaka Nithi, Meru, Nyeri, Kirinyaga and Murang'a. The area includes the Mt. Kenya and Aberdares National Parks and surrounding Forest Reserves with their Forest Stations
- iv. Project interventions will be along 24 river basins. Implementation will start in five former MKEPP river basins and 12 priority river basins for the first 4 years upon which the other 12 river basins will be covered.

Table 1: UTaNRMP River Basins

Tributaries of former Mt Kenya Pilot Project for NRM (MKEPP) River Basins (4)	 Ena (Itimbogo, Thuura and Gangara) Kapingazi/Rupingazi (Kiye, Thambana, Itabua and Kathita), Kathita (Gaciuma/Kinyaritha, Kuuru, Riiji), Kithinu/Mutonga (Naka, Nithi, South Maara, North Maara and Thuci) 	
Twelve (12)High Priority	Maragua, Murubara, Nairobi, Ragati, Rujiweru, Rupingazi,	
River Basins for UTaNRMP	SabaSaba, Thangatha, Thanantu, Thiba, Thika/Sasumua, Thingithu	
Twelve (12) Other River	Amboni/ Muringato, Iraru, Kayahwe, Chania, Mara, Mariara,	
Basins for UTaNRMP	Mathioya, Nyamindi, Ruguti, Rwamuthambi, Sagana, Ura	

v. **Project Component**;- The Implementation is through four components namely: Community Empowerment, Sustainable Rural Livelihoods, Sustainable Water Resources and Natural Resources management and Project Coordination and Management. The outcomes of these components are as follows;

Comp	onent	O	utcome
a)	Community Empowerment	•	Rural communities empowered for sustainable management of natural resources
b)	Sustainable Rural Livelihoods	•	Natural resource-based rural livelihoods sustainably improved
c)	Sustainable Water and Natural Resource Management	•	Land, water and forest resources sustainably managed for the benefit of the local people and the wider community
d)	Project Management and Coordination	•	Project effectively and efficiently managed

2.0 Purpose

- i. The main purpose of this MOU is to develop a common understanding on clear roles and responsibilities for FDAC and the CIG implementing funded activities under the UTaNRMP Matching Grants
- ii. The shared purpose is to manage the natural resources within the basin, improve the livelihoods of their members through NRM friendly income generating activities thereby reducing poverty, and improve food security and conserving the environment.

3.0 Duration and Effective Date

This MOU shall be valid for the entire micro project implementing period. This MOU will become effective on date of signing, or as otherwise indicated in this MOU.

4.0 Conditionalities

- i. The Laws of Kenya requires that for the Self Help Group CIG to be recognised, it must be registered with social services with a current certificate. All the CIG's and FDAC's must therefore be registered and have a current certificate from the department responsible for Social Development
- ii. The FDAC and CIG must have a Constitution with clear roles and responsibilities.
- iii. The FDAC and CIG must be democratically elected and registered as per their respective Constitutions.

5.0 Obligations of the Parties

5.1 FDAC

- i. FDAC will endorse all project proposals from CIG's within their areas of jurisdiction. This requires that the FDAC official endorsing the documents write his/her name, position, signature and affixes an FDAC stamp with a date.
- ii. The FDAC will regularly monitor the activities of the CIG's funded through the UTaNRMP Matching grants. A detailed monitoring plan must be agreed with the CIG before funds are released from UTaNRMP.
- iii. The FDAC in consultation with the CIG management will write monthly/quarterly reports on the implementation status of the CIG activities and forward the same to the WRUA or CFA (whichever applies), County Project Coordinator and PCT. This does not stop the FDAC from informing the WRUA/CFA, CPC and PCT of any misgivings on the operations of a CIG at any time.
- iv. UTaNRMP will train the CIG management on Participatory Monitoring and Evaluation

5.2 The CIG

- i) The CIG will be responsible for writing project proposals once the "Calls for Proposals" are done, ensure endorsement by respective FDAC and the before the Screening at County level. The CIG should seek technical guidance from line agencies technical staff or private service providers.
- ii) The CIG management/members will attend all required trainings modules before the grants are released to them
- iii) The CIG will adhere to the agreed milestones as per the project proposal. A detailed implementation plan with clear milestones must be agreed with independent oversight agent (a private service provider procured by UTaNRMP) and shared with FDAC.
- iv) The CIG management will be responsible for the administration of the financial contract signed with UTaNRMP management.
- v) The CIG will avail documents required by FDAC in order to monitor the agreed milestones.
- vi) The CIG will facilitate the activities of Independent Oversight Appraisal Team during the milestones verification missions.
- vii) The CIG will be responsible to request the County Project Coordinator to initiate the Project Completion Certificate process

6.0 Conflict Resolution

- i. The Parties will act in good faith at all times during the duration of this MOU
- ii. In case of misunderstanding, the parties will endeavour to sort issues through dialogue and arbitration when and if necessary
- iii. The relevant Laws of Kenya will apply when arbitration becomes necessary

UTaNRMP	

v Project Component: The Implementation is through four components namely: Community Empowerment, Sustainable Rural Livelihoods, Sustainable Water Resources and Natural Resources management and Project Coordination and Management. The outcomes of these components are as follows;

Component	Outcome
Community Empowerment	• Rural communities empowered for sustainable management of natural resources
Sustainable Rural Livelihoods	 Natural resource-based rural livelihoods sustainably improved
 Sustainable Water and Natural Resource Management 	• Land, water and forest resources sustainably managed for the benefit of the local people and the wider community
 Project Management and Coordination 	Project effectively and efficiently managed

THE FOCAL DEVELOPMENT AREA COMMITTEE-FDAC

- i) The FDAC is a community representatives committee elected to oversee the planning, implementation, monitoring and Evaluation of UTaNRMP activities within a Focal Development Area.
- ii) The FDA's are sub-sets of WRUA's or CFA as the case may be with a population of 800-1200 Households
- iii) The activities within an FDA are contained within the Community Action Plan (CAP) developed through the Participatory Rural Appraisal (PRA) Process. The PRA is aimed at flagging out community felt needs.
- iv) The CAP's from various FDA's are used to develop respective Annual Work plans and Budget (AWPB) for respective Counties and ultimately for UTaNRMP and the Lead Agency/Ministry
- v) The FDAC is elected for a period of 3 years and registered under Social Services.

2.0 PURPOSE

- i) The main purpose of this MOU is to develop a common understanding on clear roles and responsibilities for UTaNRMP and FDAC on the administration of the Matching Grants to Common Interest Groups within the jurisdiction of the FDAC.
- ii) The shared purpose is to manage the scarce, finite and valuable water resource within the subcatchment through a concerted effort, reducing poverty through sustainable NRM income generating activities, improve food security and conserve the environment.
- iii) Once signed, UTaNRMP will allow the FDAC to assume certain roles in the monitoring of CIG activities funded from UTaNRMP's Matching Grants within the FDAC's area of jurisdiction.

3.0 DURATION AND EFFECTIVE DATE

This MOU will be valid for the period of 5 years. This MOU will become effective on signing, or as otherwise indicated in this MOU.

4.0 CONDITIONALITIES

- i) The FDAC must be democratically elected and registered with the Social Services
- ii) The FDAC must have a Constitution with clear roles and responsibilities.

5.0 OBLIGATIONS OF THE PARTIES

5.1 The FDAC

- The FDAC will endorse all project proposals from CIG's within their areas of jurisdiction. This
 requires that the FDAC official writes his/her name, position, signature and affixes an FDAC
 stamp with a date.
- ii) The FDAC will regularly monitor the implementation of activities of the CIG funded through the Matching grants. A detailed monitoring plan must be agreed with PCT before funds are released.
- iii) The FDAC will write quarterly reports on the implementation status of the CIG activities and forward the same to the County project Coordinator with a copy to PCT. This does not stop the FDAC from informing the CPC and PCT of any misgivings on the operations of a CIG at any time.
- iv) The FDAC must open a designated bank account with a reputable Bank acceptable to UTaNRMP management for all the monitoring funds from UTaNRMP
- v) The FDAC must account for the all funds received from UTaNRMP

5.2 UTaNRMP

- i) The UTANMP will facilitate the FDAC to undertake the monitoring activity by *providing three percent* (3%) of the project's contribution to CIG activities within their boundaries.
- ii) UTaNRMP will train the FDAC management on Participatory Monitoring and Evaluation

6.0 GOVERNANCE

- i. The Monitoring funds to the FDAC will be used specifically for CIG activity monitoring and no other purpose
- ii. The FDAC officials will endeavour to adhere to the agreed monitoring plan
- iii. The FDAC officials signing this MOU commit themselves to ensure no monitoring funds are misused otherwise they will be held personally and collectively responsible.

7.0 CONFLICT RESOLUTION

- i. The Parties will act in good faith at all times during the duration of this MOU
- ii. In case of misunderstanding, the parties will endeavour to sort issues through dialogue and arbitration when and if necessary
- iii. The relevant Laws of Kenya will apply when arbitration becomes necessary

8.0 SUSPENSION OF THIS MOU

i. Either of the parties may request to suspend this MOU through writing to the other party

ii. A one month notice will be given before any suspension takes effect.

FPF 9: Business Plan Format

Item	Description
Business Summary	 Statement of the proposed business Indicate benefits from the business
Internal and external assessment	 Ability of the CIG to undertake the enterprise Measures to mitigate risks/challenges
Business growth path	Quantify the annual benefits
	Indicate the sales targets over the project period
Action plan	Outline activities to achieve the targets
	Indicate the market for your product?
Financial outlay	Forecasted financial statement should give predictions on how the business will fare financially over a given time span. Required • Should provide complete and accurate production cost
	 information costs associated with regulatory and licensing requirements (both start-up and periodic renewals) Marketing costs and a good estimate of predicted sales volume
Monitoring and Evaluation	 Plans must be made to monitor the organization's success. How will the attainment of goals be measured? What criteria will be used to evaluate the level of the organization's success? What are the boundaries of these criteria i.e., how close to ideal business conditions will be considered acceptable
Sustainability	Indicate the continuity of the enterprise

CONDITIONS APPLICABLE TO THIS AWARD NOTIFICATION

The following terms and conditions and any specifications, drawings, and additional terms and conditions which may be incorporated by reference or appended hereto are part of this purchase order. By accepting the order or any part thereof, the Supplier agrees to and accepts all terms and conditions.

- 1. The execution of all or part of this order is subject to the following conditions unless otherwise stated in writing. CIG reserves the right to reject any supplies not conforming to these conditions.
- 2. All goods covered by this order are to be met strictly in accordance with samples/specifications/schedule of requirements/brochures submitted with your quotation and accepted as the standard of supply. No alterations in any respects are permitted without prior agreement of CIG in writing.
- 3. Deliveries must be made within the accepted delivery period bidded for and specified in this order unless agreement has been reached and written confirmation given of the alteration. If the delivery of the goods is not effected within this period, this order may be cancelled without cost to CIG or alternatively supply may be obtained from other sources and you will be liable to defray any additional costs such action would incur.
- 4. All articles, material, workmanship or services covered by this order shall be the subject of CIG inspection and test at all times before, during or after completion.
- 5. The supplier warrants that all articles, material or services delivered or performed to be free from defect of material or workmanship and this warranty shall survive any inspection, delivery, acceptance or payment by CIG of the article, material or workmanship.
- 6. Goods rejected on any grounds will be returned to or collected by the Supplier at his own expense.
- 7. Goods are to be consigned to the address shown on the order and the costs are to be included in the prices quoted. Any demurrage or similar charges incurred through the Supplier's liability will be recovered from the Supplier.
- 8. The prices shown include the satisfactory packaging and packing of the goods to ensure safe transit and must be of robust construction sufficient to withstand rough handling and storage.
- 9. The No.2 copy of this Order constitutes an acceptance of this order and must be signed and returned to the Procurement Subcommittee within 7 days. Failure to comply may be taken as non-acceptance and the order is liable to cancellation.
- 10. The Procurement Subcommittee will make any amendment to this order in writing and communications or enquiries relative to the order or subsequent amendment must be addressed to the Procurement Subcommittee.
- **11.** Our payment terms are strictly 30 days net after supply. Orders not supplied within 30 days are automatically void.

FPF 14: Inspection & Acceptance Certificate

We the undersigned have inspected the goods/materials under listed, and we confirm that they are as per our specifications.

APPENDIX 6: OTHER FORMS

OF 1: Complaints Register

This register will be filled and submitted on monthly basis by the **County Project Coordinators** (CPC) to **Project Coordinating Team** (PCT) Embu.

Name of County						
S/No	Nature /Details of the complaint	Disputes resolved and by which office	Pending /forwarded to PCT for action	Contact information (complainant/group)		
1						
2						
3						
4						
5						
6						
7						
8						
9						
10						
Total no of disputes resolved						
Total no of disputes forwarded						
Total number of disputes under investigation						

OF 2: Complaints Form

Good governance and transparency are key pillars in implementing the projects funded under the matching grants. All stakeholders are encouraged to report any disputes and funds misuse (commission, collusion and omission) to the relevant authorities' complaints boxes i.e. office of the County Project Coordinator, Sub-County Office of Gender and Social Development and Project Coordinating Team (UTaNRMP).

The complaint(s) are supposed to be lodged officially through a prescribed form as shown below (**Attach relevant documents**)

1.	Name of the complainant	ID/NO		Tel No
	Relationship with th	e group		Name of
	Group	.Date of the report.		
2.	FDA	WRUA/CFA		
	COUNTY	SUB –Co	OUNTY	

Nature of dispute	Description of the complaint	Which other office have you reported	What action was taken by who& when	Recommended action
Funds Misuse				
Corruption				
Leadership				
Implementation				
delays				
Non-disclosure				
of information				
Lack of meetings				
Others				

OF3: Completion Certificate Form

This is to certify that:	(CIG name)
Having signed the respective contract no	On
/to implement	
Has on/completed the at per the contract.	foresaid project to the full satisfaction of all stakeholders as

OF 5: Terms of Reference for the Independent Oversight Agent

In line with the objectives and guidelines for the matching grants manual, the project will hire a consulting firm whose main tasks will include:

- (a) Prepare an annual activity plan to be shared with PCT.
- (b) Adequately familiarize yourself with matching grant manual.
- (c) Receive CIG proposals from the PCT, screen and review the proposals as per the guidelines of the matching grants manual;
- (d) Conduct field verifications and appraisals for ground truthing as per the matching grants manual;
- (e) Geo reference and map all the CIG activity sites to be funded.
- **(f)** Give professional advice to the PCT on all proposals received and make recommendations for the proposals that qualify for funding with specific phases for funding.
- (g) Monitor implementation milestones of the funded activities and make recommendations on subsequent phase funding;
- (h) Undertake risk management to mitigate project financial loss;
- (i) Develop and maintain a database on the status of all proposals;
- (j) Compile lessons learnt and case studies in view of enriching the matching grants manual.
- (k) Compile and share progress reports on activities funded through the matching grant with PCT.
